SHANGE - For confused girls who have considered suicide / when the rainbow is enuf

MICHAEL

"Some might write books to the Greeks. In the fifth century B.C., Zeno of Elea argued that a man could never move to where he was going.

"How?"

"To walk towards the wall he would have first to cross half the distance, then half the remaining distance again, and then half the distance left in his journey. Thus presents Zeno wrote in an argument still evident in human nature today: it seems both to impede the intellect, 'How about he doesn't move? How fails to impede the intellect, 'How about he does move?' But an infinite process requires an infinite amount of time for its completion, no? So one might think. A process is after all, something that takes place in time. But the point here is that it is impossible of compressing those infinite steps into a finite width from one end of the road to the other; that sort of thing we do with time. An infinite process is in conflict with an irreducible form."
