Labour Migration, Human Trafficking and Multinational Corporations Ato Quayson, Antonela Arhin, 2013-06-19 Although much literature on human trafficking focuses on sex trafficking, a great deal of human trafficking results from migrant workers compelled by economic deprivation in their home countries to seek better life opportunities abroad, especially in agriculture, construction, and domestic work. Such labour migration is sometimes legal and well managed, but sometimes not so, with migrant workers frequently threatened or coerced into entering debt bondage arrangements and ending up working in forced labour situations producing goods for illicit markets. This book fills a substantial gap in the existing literature, given that labour trafficking is a much more subtle form of exploitation than sex trafficking. It discusses how far large multinational corporations are involved, whether intentionally or unintentionally, in human trafficking for the purposes of labour exploitation. They explore how far corporations are driven to seek cheap labour by the need to remain commercially competitive and examine how the problem often lies with corporations' subcontractors who are not as well controlled as they might be. The essays in the volume also outline and assess measures being taken by governments and international agencies to eradicate the problem.

Weak Links Stewart Patrick, 2011 Conventional wisdom holds that weak and failing states are the source of the world's most pressing security threats. After all, the 9/11 attacks originated in an impoverished, war-ravaged country, and transnational crime appears to flourish in weakly governed states. However, our assumptions about the threats posed by failing states are based on anecdotal arguments, not on a systematic analysis of the connections between state failure and transnational security threats. Analyzing terrorism, transnational crime, WMDs, pandemic diseases, and energy insecurity, Stewart Patrick shows that while some global threats do emerge in fragile states, most of their weaknesses create misery only

for their own citizenry Moreover many threats originate farther up the chain in wealthier and more stable countries like Russia and Venezuela Weak Links will force policymakers to rethink what they assume about state failure and transnational insecurity The Ailing India Colonel Y Udaya Chandar,2016-09-23 Congratulations By around 2025 India will be the most populous country in the world surpassing China But unfortunately India is afflicted with some of the worst circumstances a country can face like a large number of farmers committing suicide rampant poverty unmatched corruption a huge illiterate population massive unemployment thousands of un electrified villages lack of toilets and sanitation millions of malnourished children and grave human trafficking of girls and women to outside countries and these prove that all is not well with the country Any number of data drawn from the utmost reliable sources put India in a bad light India is the home for one third of the world s poorest population More than 60 crore Indians defecate in the open as per the government s own revelation The book relies heavily on the data provided by UNO and the Indian government The country is hiding its face like an ostrich to two realities namely population explosion and corruption which have placed the country on the path of disaster The policy makers are concerned with their own well being and the elected representatives with their own five year term The country is drifting into an unknown realm of catastrophe After reading the book you have to decide whether the country is sick or healthy If you find the country sick please suggest how to redeem the country It is your turn now to speak Can you do anything for India Read on
