Children and Youth in African History SE Duff, 2022-12-12. This textbook introduces readers to the academic scholarship on the history of childhood and youth in sub-Saharan Africa with a particular focus on the colonial and postcolonial eras. In a series of seven chapters it addresses key themes in the historical scholarship arguing that age serves as a useful category for historical analysis in African history. Just as race class and gender can be used to understand how African societies have been structured over time so too age is a powerful tool for thinking about how power youth and seniority intersect and change over time. This is then a work of synthesis rather than of new research based on primary sources. This book will therefore introduce mainstream scholars of the history of childhood and youth to the literature on Africa and scholars of youth in Africa to debates within the wider field of the history of children and youth.
