Howard Goldsmith, 2003 Young Thomas Edison saves a child from being hit by a train and as his reward asks for training as a telegraph operator because that will help him prepare to become an inventor *Biography in the Lives of Youth* W. Bernard Lukenbill, 2006-04-30 Reflecting on the different and varied uses of biography depending on the age interests and

developmental needs of students Lukenbill breaks the genre down into the different types of biographies and how they have changed over time He includes author and literature suggestions throughout the text and concludes with an extensive bibliography of selection aids including books and periodicals for locating recommended titles SLJ *The Best Children's Literature* Ellen Trachtenberg,2003 With more than 1 000 titles represented this book comes complete with developmentally appropriate recommendations and an extensive subject index that enable children parents caregivers or educators to help find the books that are appropriate for the level of skill and the interest of the individual *A First Book in American History* Edward Eggleston,2024-11-24 IN preparing a first book of American history it is necessary to keep in mind the two purposes such a work is required to serve There are children whose school life is brief these must get all the instruction they are to receive in their country's history from a book of the grade of this To another class of pupils the first book of American history is a preparation for the intelligent study of a textbook more advanced It is a manifest waste of time and energy to require these to learn in a lower class the facts that must be re studied in a higher grade Moreover primary histories which follow the order of larger books are likely to prove dry and unsatisfactory condensations But a beginner's book ought before all things else to be interesting A fact received with the attention raised to its highest power remains fixed in the memory that which is learned listlessly is lost easily and a lifelong aversion to history is often the main result produced by the use of an unsuitable textbook at the outset The main peculiarity of the present book is that it aims to teach children the history of the country by making them acquainted with some of the most illustrious actors in it A child is interested above all in persons Biography is for him the natural door into history The order of events in a nation's life is somewhat above the reach of younger pupils but the course of human life and the personal achievements of an individual are intelligible and delightful In teaching younger pupils by means of biography which is the very alphabet of history we are following a sound principle often forgotten that primary education should be pursued along the line of the least resistance Moreover nothing is more important to the young American than an acquaintance with the careers of the great men of his country **What Columbus Found** Jane Kurtz,2007-09-11 A rhyming illustrated story about how Columbus found America along with the pumpkins that we grow and bake into pies today
