Accessing Post-School Studies Venicia McGhie & Madge du Preez, 2017-12-01 Accessing Post School Studies A student's GPS to successful learning makes a valuable contribution to often problematic and pertinent South African higher education issues such as student access and success student learning student support and student engagement In this regard the authors draw on the works of higher education theorists such as Kuh Tinto Marton and Sij The book is primarily a helpful resource for South African learners in school students at universities life orientation teachers as well as parents of prospective university students It will especially assist students to adapt to the university environment Prof Victor N Teise Sol Plaatje University Kimberley South Africa [Remote Sensing of African Mountains](#) Samuel Adelabu, Abel Ramoelo, Adeyemi Olusola, Efosa Adagbasa, 2022-08-30 This edited volume focuses on the use of remote sensing techniques to assess and monitor mountainous ecosystems in Africa with a focus on tracking changes related to climate change and human activity The book is timely as the interaction of mountain environmental dynamics with conservation and sustainability is an under researched issue The chapters in this volume use remotely sensed data to study a variety of topics related to mountains and their ecosystems including but not limited to vegetation energy systems environmental hazards ecosystem services diseases climatic shifts geological formations and geomorphological dynamics The ability to monitor assess and analyze mountainous regions is aided by the availability of remote sensing products such as optical and microwave sensors and low cost unmanned aerial vehicles UAVs The works presented here push the frontier of knowledge on mountain studies and will help shape local national and global assessments and policies including efforts toward the achievement of the African Agenda 2063 The book will be of interest to researchers and students in remote sensing geography ecology and sustainability as well as to government organizations and conservation specialists **Information Processing and Accounting Standards** Joseph Olorunfemi Akande, Shame Mugova, Oluwayemi Ibukunoluwa Odularu, 2024-09-05 This book addresses challenges caused by COVID 19 crisis on financial reporting and information management systems Information access transmission and rapid changes in the operating environment revealed inadequacies of international financial reporting standards Accounting and information are critical elements for business success While accounting processes financial information and more often guided by standards information sciences bothers on having access to the right information Crisis overtime has exposed the weaknesses and or limitations of these important ingredients of business The recent pandemic created different challenges and revealed the inadequacies of several accounting and information systems processes The dynamics of planned business restructuring activities introduced lots of considerations culminated to additional disclosure for business tax purposes The volume combines perspectives and research from academics and practitioners from the industry on modifying accounting systems and processes to be resilient in and out of crisis The chapters in the book highlight recommendations to standards and information system improvement **Corporate Social**

CSR in universities gender diversity in CSR and much more **Chemistry for a Clean and Healthy Planet** Ponnadurai Ramasami, Minu Gupta Bhowon, Sabina Jhaumeer Laulloo, Henri Li Kam Wah, 2019-09-03 These proceedings gather carefully selected peer reviewed contributions from the International Conference on Pure and Applied Chemistry ICPAC 2018 The event the latest installment in a biennial conference series was held in July 2018 in Mauritius The respective chapters in this unique collection reflect a wide range of fundamental and applied research in the chemical sciences and various

technologies technologies technologies technologies technologies Development Practice in Eastern and Southern Africa
Tshilidzi Madzivhandila, Sepo Hachigonta, Joseph Francis, Joseph Kamuzhanje, Oluwatoyin Dare Kolawole, Shirley
DeWolf, 2022-03-29 This book is a rare collection of reflective and reflexive stories that reveal how seasoned academics
agents of grassroots social change leaders and journalists transformed and shaped the development landscape in eastern and
southern Africa Whereas practical experiences are crucial assets and resources for shaping the academic environment and

development practice landscape most of the existing literature recommended as key learning materials in tertiary institutions is rarely in synch with the practical realities of development practice The shared individual lived experiences from academic endeavours and fieldwork provide hands on tools for students and emerging practitioners who might be involved in or are currently facilitating development work The thrust of the book therefore is to demystify the day to day experiences of development practitioners while contributing to learning pathways or strategies for achieving viable solutions to the myriad of challenges which grassroots communities face The relevance of the book as a crucial resource for students pursuing

development oriented degree programmes in colleges and universities is obvious Without any doubt the compilation will be handy in the implementation of diverse development oriented transformation agenda at academic programming and policy levels

Women: Wise, Optimistic, Motivating, Empowering & Nurturing Letlhokwa George Mpedi, 2024-08-05 Women s Day celebrated annually on the 9th of August commemorates the 1956 women s march against the discriminatory pass laws during the apartheid era It was on this day that women from across the nation were led by Helen Joseph Lillian Ngoyi Rahima Moosa and Sophia Williams De Bruyn to the Union Buildings to protest against the oppressive pass laws As SA History describes it The 1956 Women s March played a vital role in women becoming more visible participants in the anti apartheid struggle That is not to say that women were not already playing an instrumental role in the struggle But as history has long demonstrated this is often a forgotten aspect of our narrative This unfortunate omission underscores the importance of reclaiming and preserving these stories weaving them into the broader narrative of societal progress As we reflect on their fight and the impact of their war cry wathint abafazi wathint imbokodo uza kufa which translates to when you strike the women you strike a rock you will be crushed you will die we are given pause to reflect on the progress made in the fight for equality since then We now live in a democratic society where many of our aspirations have been realised Yet there is much we have not managed to achieve To say that South Africa has achieved equality would be a fallacy A grim reality is that in many aspects we have failed women Pay parity underrepresentation in industries unequal access to opportunities disturbing levels of violence sexism and misogyny persist unabated These issues cast a long shadow over our aspirations as a nation This book aims to shed light on these issues while honouring the progress made and highlighting the road ahead

African Security in the Anthropocene Hussein Solomon, Jude Cocodia, 2023-03-11 Much has been written on security in Africa its democratic deficit poor civil military relations and myriad conflicts but these are often treated in isolation from one another This book takes a different approach as it links all of these issues to the dynamics of the Anthropocene Penned by African scholars on the continent and in the diaspora it examines the different challenges not as separate entities but as outcomes of the Anthropocene Age In this geological epoch humans have become a global force unfortunately not necessarily for good The interaction between humans and the climate the effects of waste the impact of pollution on marine and terrestrial ecosystems the loss of biodiversity and the change in the chemical composition of the soil oceans and atmosphere are key identifiers of the age of the Anthropocene This has fueled conflict and instability from the vast swathes of the Sahel to Somalia Responding to these issues of insecurity without understanding their inter connectedness and how this relates to the environment can only result in failure From this perspective the current structures in place are inadequate for the task of confronting insecurity at the state and continental levels as represented by the African Union What is needed is a radical reevaluation of Africa s security architecture and approach to security This necessitates pooling sovereignty on a continental and global level It necessitates less state centric responses that include civil society and the business community as equal

partners of states in order to collectively confront insecurity in the age of the Anthropocene The authors are academics policy makers and military veterans who have worked in building capacity on the African continent The book is comprehensive in scope strong on theory pragmatic in policy and reflects experience from the field The authors approach makes the book easy interesting and intriguing

Corrupted Jonathan D Jansen,2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won t be solved through investments in capacity building alone because the combination of institutional capacity and institutional

integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly Study SA ,2006 **Noseweek** ,2008 *The Origins and Foundations of Music Education* Gordon Cox,Robin Stevens,2016-11-17 This landmark collection explores the origins and foundations of music education in Europe The Americas Africa and Asia Pacific and the Middle East and considers the inclusion of music as part of the compulsory school curriculum in the context of the historical social and political landscape Within each chapter the contributors explore the following key areas the aims objectives and content of the music curriculum teaching methods the provision and training of teachers of music the experiences of pupils This fully revised second edition includes new chapters on Brazil Israel Kosovo Lithuania and Turkey along with questions to encourage reflection and discussion A concluding chapter has been added to encourage readers to consider the evolution of music education globally The Foreword for this new edition has been written by Sheila Woodward President of the International Society for Music Education Contributors have been carefully selected to represent countries that have incorporated music into compulsory schooling for a variety of reasons resulting in a diverse collection which will guide future actions and policy *Mobile Learning: Pilot Projects and Initiatives* Retta Guy,2010 This book examines the meaning as well as the benefits and barriers of mobile learning details various global projects and initiatives that showcase the development and delivery of mobile learning and traces the history of mobile learning to the present and provides a glimpse into the future of mobile education and the technologies used to facilitate the learning process South African Urban Change Three Decades After Apartheid Anthony Lemon,Ronnie Donaldson,Gustav Visser,2021-06-10 This book provides an analysis of South African urban change over the past three decades It draws on a seminal text *Homes Apart* and revisits conclusions drawn in that collection that marked the final phases of urban apartheid It highlights changes in demography social as well as economic structure and their differential spatial expression across a range of urban sites in South Africa The evidence presented in this book points to a very complex set of narratives in urban South Africa and one that cannot be reduced to a singular statement so the conclusions of the various investigations are in many ways open As urban apartheid represented one clear outcome its post apartheid urban legacies varies greatly from city to city As such this book is a great resource to students and academics focused on urban change in South African cities since the demise of apartheid and scholars of urban policy making in South Africa and Southern urbanists generally **Multifunctional Hybrid Semiconductor Photocatalyst Nanomaterials** Jai Prakash,Junghyun Cho,Bruno Campos Janegitz,Shuhui Sun,2023-10-11 This book delves into the world of hybrid photocatalyst nanomaterials and their diverse applications With a focus on interdisciplinary research this book highlights the importance of these materials in addressing critical challenges in various fields The book begins by introducing the

significance of multifunctional hybrid photocatalyst nanomaterials and their potential impact on interdisciplinary research. It explores the synthesis techniques employed to create these advanced materials, emphasizing the integration of multiple components to enhance their photocatalytic performance. The applications of hybrid photocatalyst nanomaterials are thoroughly examined throughout the book. From wastewater treatment and energy production to environmental sensing and virus degradation, the diverse range of practical uses is explored in detail. The book also covers recent developments in semiconductor nanomaterials as sensors, screen printing techniques using hybrid nanomaterials, and the use of 2D and 3D printing in sensing applications.
