Working Group I, 2007-09-10 The Climate Change 2007 volumes of the Fourth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provide the most comprehensive and balanced assessment of climate change available This IPCC Working Group I report brings us completely up to date on the full range of scientific aspects of climate change Written by the world's leading experts the IPCC volumes will again prove to be invaluable for researchers students and policymakers and will form the standard reference works for policy decisions for government and industry worldwide

Many Visions, Many Aims W.H. Schmidt, S. Raizen, E.D. Britton, Leonard J. Bianchi, Richard G. Wolfe, 2008-04-06 PREFACE The Third International Mathematics and Science Study TIMSS sponsored by the International Association for the Evaluation of Educational Achievement IEA and the governments of the participating countries is a comparative study of education in mathematics and the sciences conducted in approximately 50 educational systems on six continents The goal of TIMSS is to measure student achievement in mathematics and science in participating countries and to assess some of the curricular and classroom factors that are related to student learning in these subjects The study is intended to provide educators and policy makers with an unparalleled and multidimensional perspective on mathematics and science curricula their implementation the nature of student performance in mathematics and science and the social economic and educational context in which these occur TIMSS focuses on student learning and achievement in mathematics and science at three different age levels or populations Population 1 is defined as all students enrolled in the two adjacent grades that contain the largest proportion of 9 year old students Population 2 is defined as all students enrolled in the two adjacent grades that contain the largest proportion of 13 year old students and Population 3 is defined as all students in their final year of secondary education including students in vocational education programs In addition Population 3 has two specialist subpopulations students taking advanced courses in mathematics mathematics specialists and students taking advanced courses in physics physics specialists

A Splintered Vision W.H. Schmidt, Curtis C. McKnight, S. Raizen, 2007-05-08 A Splintered Vision An Investigation of U S Science and Mathematics Education is the US report on the curriculum analysis component of the Third International Mathematics and Science Study TIMSS which was sponsored by the International Association for the Evaluation of Educational Achievement IEA The report summarizes data from the TIMSS curriculum analysis and integrates it with teacher questionnaire data from the US Japan and Germany on science and mathematics topic coverage and instructional practices The authors of A Splintered Vision discuss and provide evidence of the unfocused nature of US mathematics and science curricular intentions textbooks and teacher practices They offer the premise that producers of US textbooks and curriculum guides have attempted to answer calls for curricular reform by adding new content to already existing materials instead of devoting time to restructuring the materials The authors also suggest that US teachers

inundated with a myriad of competing visions are attempting to cover all the topics they confront in their resource documents and to meet all the instructional demands placed on them by those with a stake in education In keeping with the incremental assembly line philosophy in American society US teachers also tend to lean toward a piecemeal approach to education The authors speculate on what such practices may mean for the mathematics and science achievement of US students The work is sure to spur discussion among educational researchers policy makers and others concerned about the future of mathematics and science education in the US

Atmospheric Physics Julio V. Iribarne, H.-R. Cho, 2012-12-06 The extraordinary growth and development of atmospheric sciences during the last decades and the concern for certain applied problems such as those related to the environment have prompted the introduction of college and university courses in this field There is consequently a need for good textbooks A few appropriate books have appeared in the last few years aimed at a variety of levels and having different orientations Most of them are of rather limited scope in particular a number of them are restricted to the field of dynamics and its meteorological applications There is still a need for an elementary yet comprehensive survey of the terrestrial atmosphere This short volume attempts to fill that need This book is intended as a

textbook that can be used for a university course at a second or third year level It requires only elementary mathematics and such knowledge of physics as should be acquired in most first year general physics courses It may serve in two ways A general review of the field is provided for students who work or plan to work in other fields such as geophysics geography environmental sciences space research but are interested in acquiring general information at the same time it may serve as a general and elementary introduction for students who will later specialize in some area of atmospheric science National Agricultural Library Catalog National Agricultural Library (U.S.),1973 *H, Natural science.
