ICICKM 2017 14th International Conference on Intellectual Capital Knowledge Management & Organisational Learning Prof. Eric Tsui ,Prof. Benny Cheung,2017-07-12 *Going to University* Case, Jennifer,Marshall, Delia,2018-02-09 Around the world more young people than ever before are attending university Student numbers in South Africa have doubled since democracy and for many families higher education is a route to a better future for their children But alongside the overwhelming demand for higher education questions about its purposes have intensified Deliberations about the curriculum culture and costing of public higher education abound from student activists academics parents civil society and policy makers We know from macro research that South African graduates generally have good employment prospects But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses And even less is known about what happens to those who drop out This accessible book brings together the rich life stories of 73 young people six years after they began their university studies It traces how going to university influences not only their employment options but also nurtures the agency needed to chart their own way and to engage critically with the world around them The book offers deep insights into the ways in which public higher education is both a private and public good and it provides significant conclusions pertinent to anyone who works in and cares about universities Where Am I in the Picture? Claudia Mitchell,Katarina Giritli-Nygren,Relebohile Molestane,2023-12-18 Positionality and researcher reflexivity how to account for one s subject position remain as challenges for new researchers But they also remain as challenges for experienced researchers who are often involved in multiple research projects simultaneously *Where Am I in the Picture* sheds light on the idea of researcher positionality through visual methodologies particularly in the context of studying rurality in Canada Sweden and South Africa The book is intended for new and experienced researchers seeking to decolonize their own perspectives in research in the social sciences and humanities It incorporates photographs drawings and memory work to highlight the social constructedness of what counts as rural Drawing together compelling narratives from researchers about their positionality in studying rurality the book highlights a need for greater attention to where we are in the picture more broadly It suggests that when it comes to the rural researchers need to rethink the interplay of dominant images insider and outsider perspectives and what this interplay means in relation to interpretation *Where Am I in the Picture* presents a new vision of how to take into consideration positionality in research **Empowering Novice Academics for Student Success** Dr Johann Hugo,2021-04-26 This book is essential for academics that enter the field of higher education and training as it focuses on preparing teachers and trainers to respond appropriately to student success challenges Student success is a burning issue both globally and locally While student achievement is determined by a combination of factors teachers and their teaching practices do matter Higher education teachers are expected to fulfil different roles at different times such as planning for curriculum implementation

Tom O'Donoghue, Clive Whitehead, 2008-05-01 This edited book is a comparative study on teacher education across ten major Englishspeaking regions of the world USA English Canada England and Wales Scotland Ireland Singapore Hong Kong South Africa Australia New Zealand The focus on individual regions is reflective of a comparative approach with a long tradition going back to the turn of the twentieth century This approach is still valid at the present time as it provides one of the best ways of initially structuring our understanding of teacher education at the macro level in order to facilitate communication of the situation crossnationally and prepare the way for higher levels of analyses To this end the book has twelve chapters An introductory chapter details the focus of the book This is followed by a chapter on each of the ten regions Each of these chapters written by an expert in the field focuses on general trends in teacher education rather than on any specific aspect of it focuses primarily on pre service teacher education at the primary and post primary levels although some reference is also made to continuing professional development strikes a balance between past present and future trends deals broadly with access to the processes involved in and the structure of teacher education has a unique structure rather than one based upon a formulaic approach In the final chapter major themes are distilled from the case studies It also outlines how the book furthers understanding of teacher education internationally considers other groupings of regions ripe for consideration along similar lines and indicates initiatives arising out of the case studies worthy of consideration for the improvement of teacher education cross nationally Democracy and Decency Paul R. Carr, P. L. Thomas, Brad J. Porfilio, Julie A.

Gorlewski, 2016-02-01 Democracy can mean a range of concepts covering everything from freedoms rights elections governments processes philosophies and a panoply of abstract and concrete notions that can be mediated by power positionality culture time and space Democracy can also be translated into brute force hegemony docility compliance and conformity as in wars will be decided on the basis of the needs of elites or major decisions about spending finite resources will be the domain of the few over the masses or people will be divided along the lines of race ethnicity class religion etc because it is advantageous for maintaining exploitative political systems in place to do so Often these frameworks are

developed and reified based on the notion that elections give the right to societies or segments of societies to install regimes institutions and operating systems that are then supposedly legitimated and rendered infinitely just because formal power resides in the hands of those dominating forces This book is interested in advancing a critical analysis of the hegemonic paradigm described above one that seeks higher levels of political literacy and consciousness and one that makes the connection with education What does education have to do with democracy How does education shape influence impinge on impact negate facilitate and or change the context contours and realities of democracy How can we teach for and about democracy to alter and transform the essence of what democracy is and importantly what it should be This book advances the notion of decency in relation to democracy and is underpinned by an analysis of meaningful critically engaged education Is it enough to be kind nice generous and hopeful when we can also see signs of rampant entrenched and debilitating racism sexism poverty violence injustice war and other social inequalities If democracy is intended to be a legitimating force for good how does education inform democracy What types of knowledge experience analysis and being are helpful to bring about newer more meaningful and socially just forms of democracy Throughout some twenty chapters from a range of international scholars this book includes three sections Constructing Meanings for Democracy and Decency Justice for All as Praxis and Social Justice in Action for Democracy Decency and Diversity International Perspectives The underlying thread that is interwoven through the texts is a critical reappraisal of normative hegemonic interpretations of how power is infused into the educational realm and importantly how democracy can be re situated and re formulated so as to more meaningfully engage society and education

Teacher Preparation in South Africa Linda Chisholm, 2019-10-09 The book will focus on the emergence of a racially divided system of teacher preparation and its dismantling post apartheid It will explore the policies and politics of discrepant pathways to teacher preparation within the context of international and comparative trends
