Global Geostrategy Brian Blouet,2013-05-13 This is a new examination of Halford Mackinder s seminal global geostrategic work from the perspective of geography diplomatic history political science international relations imperial history and the space age Mackinder was a man ahead of his time He foresaw many of the key strategic issues that came to dominate the twentieth century Until the disintegration of the Soviet Union western defence strategists feared that one power or alliance might come to dominate Eurasia Admiral Mahan discussed this issue in The Problem of Asia 1900 but Mackinder made the most authoritative statement in The Geographical Pivot of History 1904 He argued that in the closed Heart Land of Euroasia was a strategically placed region with great resources that if controlled by one force could be the basis of a World Empire James Kurth in Foreign Affairs has commented that it has taken two World Wars and the Cold War to prevent Mackinder s prophecy becoming reality In World War I and World War II Germany achieved huge territorial gains at the expense of the Russian empire and the Soviet Union In the former conflict the Russian empire was defeated by Germany but the western powers insisted that the territorial gains made by Germany at the treaty of Brest Litovsk be given up In World War II Britain and the US gave material support to Stalin s totalitarian regime to prevent Nazi Germany gaining control of the territory and resources that might have been a basis for world domination The west highly conscious of Mackinder s dictum 1919 that Who rules East Europe commands the Heartland quickly adopted policies to contain the Soviet Union History has therefore proved Mackinder s work to be of vital importance to generations of strategic thinking and he remains a key influence in the new millennium This book will be of great interest to all students and scholars of strategic studies and military history and of geopolitics in particular

Geography in British Schools, 1885-2000 Rex Walford,2019-07-23 This history charts how geography rose to popularity on a tide of imperial enthusiasms in Victorian time and made its way into many elementary schools in the latter half of the 19th century Many geography lessons were not dominated by the rote learning of capes and bays and some of the pioneers of the subject led the way in the use of models visual aids and object lessons in schools The book explores Scott Keltie s report of 1886 as a catalyst for development Despite

the founding of the Geographical Association in 1893 the subject needed a series of concerted political campaigns in the early 20th century to establish itself in the secondary sector The growth of the regional approach field work and of sample studies expanded the subject between the world wars before a major conceptual revolution invigorated and challenged teachers of the subject in the post war period *Research Directions, Challenges and Achievements of Modern Geography* Jerzy Bański, Michael Meadows, 2023-12-01 This book identifies and discusses research directions challenges and achievements in contemporary geography It also documents the most current theoretical and methodological considerations undertaken by scientists representing various sub disciplines of geography with particular reference to human geography It was assumed that the thematic structure of the currently active International Geographical Union IGU problem commissions corresponds to the most relevant and current research directions in geography Reflecting this assumption the book consists of 14 chapters contributed by geographers representing 14 problem commissions of the IGU which allows us to examine geography from different perspectives and to provide the reader with a complete overview of contemporary research issues in human geography The first part discusses contemporary research problems and issues related to scientific methodology and achievements of selected geographical sub disciplines including urban geography agricultural geography transport geography and political geography among others The second part focuses on the interdisciplinarity of geography and the topics of global dimension undertaken by geographers such as global change GIS and geospatial technology marginalization and environmental change This part also discusses the internal relations between geographical specializations and their links with other related sciences including geology sociology and economics The third part discusses the holistic approaches of geography applied to particular regions territories or conditions Africa coastal systems geomorphology and local development
