*Urban Comics* Dominic Davies, 2019-02-21 Urban Comics Infrastructure and the Global City in Contemporary Graphic Narratives makes an important and timely contribution both to comics studies and urban studies offering a decolonisation and reconfiguration of both of these already interdisciplinary fields With chapter length discussions of comics from cities such as Cairo Cape Town New Orleans Delhi and Beirut this book shows how artistic collectives and urban social movements working across the global South are producing some of the most exciting and formally innovative graphic narratives of the contemporary moment Throughout the author reads an expansive range of graphic narratives

through the vocabulary of urban studies to argue that these formal innovations should be thought of as a kind of infrastructure This infrastructural form allows urban comics to reveal that the built environments of our cities are not static banal or depoliticised but rather highly charged material spaces that allow some forms of social life to exist while also prohibiting others Built from a formal infrastructure of grids gutters and panels and capable of volumetric multi scalar perspectives this book shows how urban comics are able to represent repair and even rebuild contemporary global cities toward more socially just and sustainable ends Operating at the intersection of comics studies and urban studies and offering large global surveys alongside close textual and visual analyses this book explores and opens up the fascinating relationship between comics and graphic narratives on the one hand and cities and urban spaces on the other [Saturday Review](#) ,1969
