The ^ADiverted Dream Steven Brint,Jerome Karabel,1989-09-07 The two year or community college was begun

at the turn of the century as a means of offering limited income students the opportunity to attend college In the past two decades however the community college has experienced a profound change shifting its emphasis from liberal arts transfer courses to terminal vocational programs With two thirds of community college students enrolled in vocational programs the authors argue the promise of equal educational opportunity for all is seriously undermined Long overdue this landmark book the first full scale examination of the place of the two year college in American society sheds critical light on what is distinctive about American education and American society itself Entrepreneurship Education in Tourism and Hospitality Management Bagri, Satish Chandra,Dhodi, R.K.,Junaid, K.C.,2022-05-27 Entrepreneurship education is a rapidly evolving field that is critical to the development of well equipped and competent business leaders The importance of training the future generation of managers and leaders cannot be overlooked as they play a vital role in ensuring the survival of various industries and companies Entrepreneurship Education in Tourism and Hospitality Management provides an in depth look at various cases of entrepreneurship education in the tourism and hospitality industries across the world as well as their recent changes and developments This book also advances the literature in the field of entrepreneurship education by broadening the discussion on the recent trends and ongoing challenges to include perspectives on creating the next generation of tourism and hospitality entrepreneurs Covering topics such as digital education and tourism sustainability this reference work is ideal for administrators academicians policymakers entrepreneurs scholars researchers practitioners instructors and students The Contradictory College Kevin James Dougherty,1994-01-01 This book systematically analyzes the evidence on four key issues that have divided commentators on the community college The community college s impact on students business and the universities the factors behind its rise since 1900 the causes of its swift vocationalization after 1960 and what direction the community college should take in the future *Educating Entrepreneurial Citizens* Joan DeJaeghere,2017-05-18 Educating Entrepreneurial Citizens examines the multiple and contradictory purposes and effects of entrepreneurship education aimed at addressing youth unemployment and alleviating poverty in Tanzania Governments in sub Saharan Africa face increasing pressure to educate young people through secondary school supposedly equipping them with knowledge and skills for employment and their future At the same time many youths do not complete their education and there are insufficient jobs to employ graduates The development community sees entrepreneurship education as one viable solution to the double edged problem of inadequate education and few jobs But while entrepreneurship education is aligned with a governing rationality of neoliberalism that requires individuals to create their own livelihoods without government social supports the two NGO programs discussed in this book draw on a rights based discourse that seeks to educate those not served by government schools providing them with educational and social supports to be included in society The chapters explore the tensions that occur when international organizations and NGOs draw on both neoliberal and liberal human rights discourses to address the problems of poverty unemployment and poor quality education Furthermore

when these neo liberal perspectives meet local ideas of reciprocity and solidarity they create friction and alter the programs and effects they have on youth The book introduces the concept of entrepreneurial citizens those who utilize their innovative skills and behaviors to claim both economic and social rights from which they had been previously excluded The programs taught youth how to develop their own enterprises to earn profits and to save for their own futures but youth used their education skills and labor to provide for basic needs to be included in society and to support their and their families well being By showing the contradictory effects of entrepreneurship education programs the book asks international agencies and governments to consider how they can go beyond technical approaches of creating enterprises and increasing income and head toward approaches that consider the kinds of labor that young people and communities value for their wellbeing This book will be of interest to scholars and practitioners of education and international development youth studies African Studies and entrepreneurship social entrepreneurship education
