Twenty-First Century Verity Burgmann, 2016-04-14 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license Globalization has adversely affected working class organization and mobilization increasing inequality by redistribution upwards from labour to capital However workers around the world are challenging their increased exploitation by globalizing corporations In developed countries many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances in developing countries militant new labour movements are emerging Drawing

upon insights in anti determinist Marxian perspectives Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century With case studies from around the world including Greece since 2008 she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization This book will be of interest to students and scholars of labour studies globalization political economy Marxism and sociology of work

Where Bad Jobs Are Better Francoise Carre,Chris Tilly,2017-11-16 Retail is now the largest employer in the United States For the most part retail jobs are bad jobs characterized by low wages unpredictable work schedules and few opportunities for advancement However labor experts Fran oise Carr and Chris Tilly show that these conditions are not inevitable In Where Bad Jobs Are Better they investigate retail work across different industries and seven countries to demonstrate that better retail jobs are not just possible but already exist By carefully analyzing the factors that lead to more desirable retail jobs Where Bad Jobs Are Better charts a path to improving job quality for all low wage jobs In surveying retail work across the United States Carr and Tilly find that the majority of retail workers receive low pay and nearly half work part time which contributes to high turnover and low productivity Jobs staffed predominantly by women such as grocery store cashiers pay even less than retail jobs in male dominated fields such as consumer electronics Yet when comparing these jobs to similar positions in Western Europe Carr and Tilly find surprising differences In France though supermarket cashiers perform essentially the same work as cashiers in the United States they receive higher pay are mostly full time and experience lower turnover and higher productivity And unlike the United States where many retail employees are subject to unpredictable schedules in Germany retailers are required by law to provide their employees notice of work schedules six months in advance The authors show that disparities in job quality are largely the result of differing social norms and national institutions For instance weak labor regulations and the decline of unions in the United States have enabled retailers to cut labor costs aggressively in ways that depress wages and discourage full time work On the other hand higher minimum wages greater government regulation of work schedules and stronger collective bargaining through unions and works councils have improved the quality of retail jobs in Europe As retail and service work continue to expand American employers and policymakers will have to decide the extent to which these jobs will be good or bad Where Bad Jobs Are Better shows how stronger rules and regulations can improve the lives of retail workers and boost the quality of low wage jobs across the board

Navigating the New Retail Landscape Alan Treadgold, Jonathan Reynolds, 2016-06-24 The retail industry globally is in the early stages of an era of profound perhaps unprecedented change. This book is intended to serve as a robust and practical guide to leaders of enterprises tasked with both understanding and delivering success in the new landscape of retailing. The book firstly describes the major directions and drivers of change that define the new global landscape of retailing. Part 1 Accelerating technology change: the rise to prominence globally of internet enabled shoppers and the rapid emergence of entirely new retail enterprises and business models are combining to re-shape the very fundamentals of the retail industry. No longer are shops needed to be in the business of retailing. No longer is choice for the shopper limited to the neighbourhood town or even country in which they live. No longer is the act of retailing solely the preserve of traditional retail enterprises as internet enabled businesses, technology, logistics, suppliers and financial services enterprises all seek direct relationships with the shopper. The new landscape of retailing is an unforgiving one. Success can be achieved more quickly than has ever been possible before but failure is equally rapid. The opportunities in the new landscape of retailing are profound but so too are the challenges. Part 2 of this book discusses the structures, skills and capabilities retail enterprises will need if they are to be successful in this new landscape and the skills and perspectives that will be required of the leaders of retail enterprises. Case studies of innovative and successful enterprises are presented throughout the book to illustrate the themes discussed. Frameworks are presented to provide practical guidance for enterprise leaders to understand and contextualise the nature of change that is re-shaping retail landscapes globally. Clear guidance is given of the capabilities, skills and perspectives that will be needed at both an enterprise and a personal leadership level to deliver success in the new landscape of retailing.

Consumers want socially responsible products, employees want meaningful work, investors now screen on environmental, social and governance criteria, clicktivists create social media storms over company missteps. This book lays out a roadmap for organizational leaders who have hit the limits of the supposed win-win of shared value to explore how companies can cope with real trade-offs, innovating around them or even thriving within them. Suggesting that the shared value mindset may actually get in the

way of progress bestselling author Sarah Kaplan shows in The 360 Corporation how trade offs rather than being confusing or problematic can actually be the source of organizational resilience and transformation
