The ESD approach is based on learning methods that motivate and empower learners to make informed decisions, change their behaviour, and take responsible action for environmental integrity, economic viability, and a just society for present and future generations using a more hands-on and interactive approach than standardized education methods. The modules have been developed in collaboration with the Ministry of Natural Resources and Tourism and the Ministry of Education of the United Republic of Tanzania as part of the project *Forests for a Sustainable Future: Educating Children* implemented by FAO and funded by the German Federal Ministry for Food and Agriculture (BMEL).

**Cracking the Code** John Mark Sheppard, 2013-05-22 *Cracking the Code: The Confused Traveler's Guide to Liberian English* is the brainchild of John Mark Sheppard, who moved with his family from the United States to Liberia when he was just three years old. He learned Liberian English as a second language as he spent his childhood and teen years immersed in the Liberian culture. After college in the United States, John Mark returned to Liberia and began a more formal study of Liberia's history, customs, and languages. In this truly fascinating book, John Mark combines his training in linguistics with an extensive knowledge of the language he has grown to love. Besides the more than one thousand helpful explanations of specific words or phrases, *Cracking the Code: The Confused Traveler's Guide to Liberian English* includes a fascinating history of the people, groups, and languages of the region, a pronunciation guide, a list of Liberian proverbs, and practical advice on how to avoid embarrassing yourself. *Following the Water* Kylie Carman-Brown, 2019-10-18 *Water reflects culture*. This book is a detailed analysis of hydrological change in Australia's largest inland waterway in Australia, the Gippsland Lakes in Victoria, in the first 70 years of white settlement. *Following the Water* is our primal need. Unlike many histories, this book looks at the entire hydrological cycle in one place rather than focusing on one bit. Deftly weaving threads from history, hydrology, and psychology into one. *Following the Water* explores not just what settlers did to the waterscape but probes their motivation for doing so. By combining unlikely elements together, such as swamp drainage, water proofing techniques, and temperance lobbying, the book reveals a web of perceptions about how water should be. With this laid clear, we can ask how
