

This kit contains:

- A wooden loom (26.5x17cm-10¹/₂ x 6¹/₂)
- One wooden comb, two loom shuttles and two thread spacers.
- Four coloured lengths of wool to get you started

Loom Shuttle

Thread spacer

Weaving Loom

Comb

Instructions: Put your loom on a table in front of you with the notches positioned at the top and the bottom of your frame.

1. 'Warp' your loom. Tie one end of your chosen colour of thread around the bottom left-hand corner and wind it up and down through the notches so they are well held - but not too tight. Tie off the thread in the opposite corner and cut off the excess.

2. Weave the thread spacer through the warp threads (over and under) to separate them slightly in order to pass a loom shuttle through the threads easily. Wrap a length of thread around the loom shuttle, tie one end to the bottom of the first warp thread and push the loom shuttle through the warp thread going over and under.

3. To weave the next row, your shuttle should weave under the threads you went over and over those you went under. Use the comb to tamp the weave down so it is all snug together

4. Once you have completed your weaving cut the thread leaving a 4cm long tail. Tie the loose end to the last warp thread and trim the tails off the weaving. Now your weave is ready to use to make a purse or a scarf or a hat or...anything you like!

Remember:

When weaving do **not** pull the threads too tight otherwise the weaving will become pulled in at the centre.

Potholder Loom Weaving Noreen Crone-Findlay, 2020-01-13 Potholder looms can make so much more than potholders. You can weave on these popular looms using the traditional loops or with nearly any yarn to make a variety of patterns including Plain Weave, Twill and Checkerboard. You can also weave shapes other than squares such as rectangles and triangles. This variety of options means you can weave just the modules you need to make projects from wall hangings to place mats, runners, baskets and more. Noreen teaches and explains each step of the techniques and projects in full detail with photos so even if you have never woven before you'll easily be able to accomplish any project in this book. Tapestry weaving is also fun on the potholder loom and Noreen shows you how with detailed instructions for setting up your loom and working tapestry techniques. Start with the Tapestry Sampler and then try your hand at personalized wall dolls, colorful wall hangings and decorative art pieces. All you need to know for successful weaving on your potholder loom is in this comprehensive book. 30 projects for wall hangings, place mats, baskets and more. Weave with yarn or loops. Instructions for the traditional 18 peg loom and also for 9 and 27 peg looms.

The Complete Technology Book on Textile Spinning, Weaving, Finishing and Printing (3rd Revised Edition) NIIR Board of Consultants & Engineers, 2017-09-09. Textile industry is one of the few basic industries which is characterised as a necessary component of human life. One may classify it as a more glamorous industry but whatever it is, it provides with the basic requirement called clothes. Spinning is the process of converting cotton or manmade fibre into yarn to be used for weaving and knitting. Weaving is a method of textile production in which two distinct sets of yarns or threads are interlaced at right angles to form a fabric or cloth. Finishing refers to the processes that convert the woven or knitted cloth into a usable material. Printing is the process of applying colour to fabric in definite patterns or designs. The textile industry occupies an important position in the total volume of merchandise trade across countries. Developing countries account for little over two third of world exports in textiles and clothing. It is the second largest employer after agriculture, providing employment to over 45 million people directly and 60 million people indirectly. The future for the textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. This book is based on the latest technology involved in textile industry which describes the processes available at the spinning and fabric forming stages coupled with the complexities of the finishing and colouration processes to the production of wide ranges of products. The major contents of the book are: dyeing of textile materials, principles of spinning process preparatory to spinning, principles of weaving, textile chemicals, yarn preparation, weaving and woven fabrics, knitting and knit fabrics, nonconventional fabrics, cellulosics, mixed fibers, printing compositions, printing processes, transfer dyes, transfer inks, etc. It describes the manufacturing processes and photographs of plant machinery with supplier's contact details. It will be a standard reference book for professionals, entrepreneurs, textile mill owners, those studying and researching in this important area and others interested in the field of textile industry.
