

## What Was the Driving Force Behind European Imperialism in Africa?

For the 300 years between 1500 and 1800, European nations traded for slaves, gold, and ivory along the west coast of Africa, but they did not go deeply into the continent. In the 1800s this changed as European explorers pushed their way into the interiors of western and central Africa. By the 1880s Africa was under full assault as European nations competed with one another for control for the continent. This Mini-Q takes a look at this quest for colonies and asks what was the primary driving force behind it.

*Africa's Development Impasse* Doctor Stefan Andreasson, 2013-07-04 Orthodox strategies for socio economic development have failed spectacularly in Southern Africa Neither the developmental state nor neoliberal reform seems able to provide a solution to Africa's problems In *Africa's Development Impasse* Stefan Andreasson analyses this failure and explores the potential for post development alternatives Examining the post independence trajectories of Botswana Zimbabwe and South Africa the book shows three different examples of this failure to overcome a debilitating colonial legacy Andreasson then argues that it is now time to resuscitate post development theory's challenge to conventional development In doing this he claims we face the enormous challenge of translating post development into actual politics for a socially and politically sustainable future and using it as a dialogue about what the aims and aspirations of post colonial societies might become This important fusion of theory with empirical case studies will be essential reading for students of development politics and Africa
