

## Odometer and tripmeter modes

1. Odometer/tripmeter/fuel reserve tripmeter  
Push the "SELECT" button to switch the display between the odometer mode "ODO" and the tripmeter modes "TRIP A" and "TRIP B" in the following order:

"TRIP A" → "TRIP B" → "ODO" → "TRIP A"

When the fuel amount in the fuel tank decreases to 3.4 L (0.90 US gal) (0.75 Imp. gal), the left segment of the fuel meter will start flashing, and the odometer display will automatically change to the fuel reserve tripmeter mode "F-TRIP" and start counting the distance traveled from that point. In that case, push the "SELECT" button to switch the display between the various tripmeter and odometer modes in the following order:

"F-TRIP" → "TRIP A" → "TRIP B" → "ODO" → "F-TRIP"

To reset a tripmeter, select it by pushing the "SELECT" button, and then push the "RESET" button for at least one second. If you do not reset the fuel reserve tripmeter manually, it will reset itself automatically and the display will return to the prior mode after refueling and traveling 5 km (3 mi).

## Fuel meter

## 1. Fuel meter

The fuel meter indicates the amount of fuel in the fuel tank. The display segments of the fuel meter disappear towards "E" (Empty) as the fuel level decreases. When only one segment is left near "E", refuel as soon as possible.

## NOTE:

This fuel meter is equipped with a self-diagnosis system. If the electrical circuit is defective, the following cycle will be repeated until the malfunction is corrected: "E" (Empty), "F" (Full) and symbol "g" will flash eight times, then go off for approximately 3 seconds. If this occurs, have a Yamaha dealer check the electrical circuit.

## Coolant temperature mode

## 1. Coolant temperature display

The coolant temperature display indicates the temperature of the coolant. Push the "RESET" button to switch the coolant temperature display to the air intake temperature display.

## NOTE:

When the coolant temperature display is selected, "C" is displayed for one second, and then the coolant temperature is displayed.

## CAUTION:

Do not operate the engine if it is overheated.

## Air intake temperature mode

## 1. Air intake temperature display

The air intake temperature display indicates the temperature of the air drawn into the air filter case. Push the "RESET" button to switch the coolant temperature display to the air intake temperature display.
