Saturday Review of Politics, Literature, Science, Art, and Finance ,1864 **The Heavens Declare** Rodney Holder, 2012-02-01 One of the central themes of inquiry for Karl Barth the twentieth century Protestant theologian was the notion of revelation Although he was suspicious of natural theology i e the seeking of evidence for God s existence in the ordered structure of the world recent scientific advances notably in physics and cosmology and the flourishing modern dialogue between science and religion offer compelling reasons to revisit Barth s thinking on the concept We must again ask whether and how it might be possible to hold together the notion of revelation whilst employing reason and scientific evidence in the justification of belief In *The Heavens Declare* author Rodney Holder re examines Barth s natural theology argument and then explores how it has been critiqued and responded to by others starting with Dietrich Bonhoeffer and Wolfhart Pannenberg Holder then considers the contributions of two notable British participants in the science religion dialogue Thomas Torrance and Alister McGrath who despite their repudiation of natural theology in the traditional sense also provide many positive lessons The book concludes by defending an overall position which takes into account the ideas of the aforementioned theologians as well as others who are currently engaged positively in natural theology such as John Polkinghorne and Richard Swinburne Holder s new study is sure to be of interest to theologians philosophers of religion and all scholars interested in the science religion dialogue especially those interested in natural theology as an enterprise in itself
