Science and Religion Lucas F. Johnston, Whitney Bauman, 2014-02-05 This collection offers new perspectives on the study of science and religion bringing together articles that highlight the differences between epistemological systems and call into question the dominant narrative of modern science The volume provides historical context for the contemporary discourse around religion and science detailing the emergence of modern science from earlier movements related to magic and other esoteric arts the impact of the Reformation on science and the dependence of Western science on the so called Golden Age of Islam In addition contributors examine the impacts of Western science and colonialism on the ongoing theft of the biological resources of traditional and indigenous communities in the name of science and medicine The volume s multi perspectival approach aims to refocus the terms of the conversation around science and religion taking into consideration multiple rationalities outside of the dominant discourse

Science and Christianity: Close Partners or Mortal Enemies? Dave Armstrong, 2012-02-13 It s very fashionable nowadays to assert that Christianity and science are antithetical or that God has been ruled out of science or disproven particularly by Darwinian evolution or that science is based on reason and evidence whereas religion being faith

based supposedly cares little or nothing for same or that one cannot consistently be a Christian and also a real scientist I shall contend that not only are science and Christianity completely compatible but that modern science would not have even gotten off the ground if it hadn't been for medieval scholastic Catholic thought I shall demonstrate that the foundations of modern science in the 16th century were overwhelmingly Christian and theistic The notion that science and religion are fundamentally incompatible is ludicrous and would obliterate science at its very roots Includes mini biographies of 293 scientists and a chart of 115 scientific fields of study founded or extraordinarily advanced by Christian or theistic scientists

The Saturday Review of Politics, Literature, Science and Art, 1876 **Where Wisdom May Be Found** Edward P. Meadors, 2019-08-29 All Christian colleges and universities hail the integration of faith and learning as a premier mission objective There is less agreement as to what the integration of faith and learning should look like in pedagogical and cross disciplinary terms This volume proposes that faith and learning are interrelated from the start Discovery of truth within the academic disciplines cultivates discipline specific wisdom that both accords with all reality and complements the whole counsel of God Where Wisdom May Be Found brings together a faculty of twenty seven accomplished voices from across curricula to celebrate each field's capacity for revealing wisdom from all corners of God's creative design In synthesis these voices declare the depth and richness of the wisdom and knowledge of God for the educational advancement and holistic equipping of the corporate people of God Contributing authors Dorothy Chappell Hadley Mitchell Kenman Wong Russ Howell Mike Guebert James Ault Clinton Arnold Kevin Vanhoozer Jeffry Davis Cameron Anderson Jim Bradley Derek Schuurman Kersten Priest Leland Ryken David Entwistle Stephen Contakes Rick Kennedy James Spiegel Arnold Sikkema Tony Payne Jeff Greenman Dave Wolf Nathan Thielman Paul DeHart Angela Konrad Brian Brock The Clock C. S. Wimmer, 2015-06-23 God's voice whispers through the words of the prophet Isaiah I make known the end from the beginning from ancient times what is still to come Isaiah 46:10 NIV When warning his disciples about heaven and earth passing away Jesus said No one knows about that day or hour not even the angels in heaven nor the Son but only the Father Be on guard Be alert You do not know when that time will come Mark 13:32-33 NIV Are we to believe that God makes known the end from the beginning Or should we believe that the day and the hour are unknowable In truth these seemingly contradictory verses in Scripture are equally believable when time is viewed on two different clocks To date however humankind has relied solely on the 24 hour clock that secured residence within the human mind more than 8 000 years ago Humanity's one clock perspective of time is entirely useless in determining spiritual beginnings and endings Yet a different perspective emerges from the text of Genesis 1 which does in fact make known the end from the beginning The Clock revealed within the pages of this book will help the human spirit develop a healthy theology of time and not a moment too soon Through the lens of light color and image The Clock's colorful face revisits the past identifies the present and makes known the future while orienting the human mind on its journey through time If Jews and Christians desire additional insight into our shared spiritual beginnings we must

Victorian Interdisciplinarity and the Sciences Bernard Lightman, Efram Sera-Shriar, 2024-05-14 The specialization thesis the idea that nineteenth century science fragmented into separate forms of knowledge that led to the creation of modern disciplines has played an integral role in the way historians have described the changing disciplinary map of nineteenth century British science This volume critically reevaluates this dominant narrative in the historiography While new disciplines did emerge during the nineteenth century the intellectual landscape was far muddier and in many cases new forms of specialist knowledge continued to cross boundaries while integrating ideas from other areas of study Through a history of Victorian interdisciplinarity this volume offers a more complicated and innovative analysis of discipline formation Harnessing the techniques of cultural and intellectual history studies of visual culture Victorian studies and literary studies contributors break out of subject based silos exposing the tension between the rhetorical push for specialization and the actual practice of knowledge sharing across disciplines during the nineteenth century **Dictionary of Christianity and Science** Zondervan, 2017-04-25 The definitive reference work on science and Christian belief How does Christian theology relate to scientific inquiry What are the competing philosophies of science and do they work with a Christian faith based on the Bible No reference work has covered this terrain sufficiently until now Featuring entries from over 140 international contributors

philosophical issues philosophy of religion in order to demonstrate that it can contribute to contemporary Anglo American discussions Michael S Jones is Assistant Professor of Philosophy at Liberty University *Some Essentials of Religion* J. Paterson Smyth,Edward John Bidwell,John Henry Cody,Alexander John Doull,Henry M. Little,Derwyn Trevor Owen,John Charles Roper,2023-10-04 In *Some Essentials of Religion* readers are invited into a profound exploration of the core tenets that underpin religious thought and practice stretching across a range of Christian theological perspectives This anthology brings together an array of essays and lectures each offering a unique interpretation of religious essentials reflecting both diverse liturgical styles and an underlying unity of purpose Without singling out individual essays the collection as a whole is illustrative of a dedicated inquiry into the spiritual moral and philosophical pillars that define religious faith while providing a broad canvas of reflective discourse that questions elucidates and affirms the quintessence of spiritual life The contributors to this anthology are esteemed clergymen and theologians whose scholarly pursuits and pastoral experiences coalesce to present an enriched dialogue on religious essentials Coming from varied backgrounds within ecclesiastical and academic institutions these authors lend their voices to a conversation deeply rooted in the socio cultural and theological movements of their time Their collective expertise not only anchors the anthology firmly within its historical and cultural milieu but also propels it as a vessel of dialogue that bridges the gap between traditional religious thought and contemporary spiritual inquiry Recommended to readers with a keen interest in theology and religious studies *Some Essentials of Religion* is a treasure trove of insights for anyone eager to traverse the multi faceted landscapes of faith and spirituality This collection offers an invaluable opportunity to engage with a multitude of perspectives illuminating the rich diversity of religious thought and fostering a deeper understanding of the enduring questions at the heart of human existence The collection stands as an educational and dialogical asset inviting readers to ponder and appreciate the enduring dialogue between faith reason and experience *Science and the Religious Right* John Jagger,2010-09 In *Science and the Religious Right* biophysicist John Jagger discusses false scientific and social positions of the Religious Right including the ideas that the earth is only six thousand years old evolution never occurred and the United States was founded as a Christian nation At best such stances of the Religious Right have produced extensive political turmoil they undermine true understanding of ourselves and the world we live in Many Americans know little science and are thus easily confused by such positions of religious fundamentalists Jagger begins with a scientific primer for the intelligent and curious nonscientist with simple explanations of such highly successful theories as relativity and evolution He then discusses religion explaining why many scientists become freethinkers after the models of Thomas Jefferson and Benjamin Franklin who did not believe in a personal God He shows that while mainstream religion largely accepts modern science the Religious Right holds anti science and anti intellectual ideas that have great social and political consequence they want to replace teaching of evolution in our public schools with creationist ideas that are totally unsupported by science *Science and the Religious Right* shows why knowledge of some basic science as

well as of correct religious history is essential for understanding false stances of the Religious Right that threaten American values and scientific truth

Youth Ministry After the Pandemic Kevin Muriithi Ndereba, 2025-07-25 Youth faith formation usually takes the form of a narrow privatized or spiritualized perspective Since young people are a critical demographic in the Global South and Africa more specifically their faith formation must shape them to engage public life so as to enhance human flourishing While much of the literature on youth and theology is Western in orientation this book makes use of scholarly sources in African and Global Christianity so as to shape youth work in the Global South It shows that young people can help guide the African church to fulfill both the Great Commission and the Great Commandment and so achieve its spiritual and prophetic mandate It engages with youth culture emerging non religious identities digital church or ecclesiology ecotheology and climate change and economic justice

Does Religion Matter Morally? A. W. Musschenga, 1995 In the dominant view morality is more rational and universal than and therefore independent from christian religion Believers do not have exclusive moral knowledge Moral principles can be known by anyone Morality not religion is the supreme judge of human actions in the world Some contributors to this volume defend this view on theological and philosophical grounds The advantages of such a view for thinking about a common global morality are clear However according to many authors the conception of morality underlying this view is at the least impoverished if not wrong this view

cannot explain the importance and the persistence of moral taboos Furthermore every morality is influenced by metaphysical and anthropological assumptions whether or not religious the so called modern rational secular morality The central moral question in the alternative narrative concept of morality is Who am I who do I want to be and not What is the right action In this approach not universal principles but tradition dependant stories constitute the core of a morality Are these concepts more adequate for understanding the relation of religion to morality Do they have room for the project of a universal morality of human rights
