Hartmann,Nikos Prantzos,2018-10-11 Dealing with astrophysics derived from the radiation emitted by radioactive atomic nuclei this book describes the different methods used to measure cosmic radio isotopes It demonstrates how this astronomical window has contributed to the understanding of the sources and the chemical evolution of cosmic gas Reference materials and explanations are included for students in advanced stages of their education Nuclear reactions in different sites across the universe lead to the production of stable and unstable nuclei Their abundances can be measured through different methods allowing to study the various nuclear processes taking place in cosmic environments Nucleosynthesis is the cosmic formation of new nuclear species starting from hydrogen and helium resulting from the big bang origins Stars create and eject synthesized nuclei during their evolution and explosions Incorporation of the new interstellar composition into next generation stars characterises the compositional chemical evolution of cosmic gas in and between galaxies Radioactive species have unique messages about how this occurs Since the first Edition of this book published in 2011 with the title Astronomy with Radioactivities long awaited new direct observations of supernova radioactivity have been made and are now addressed in two updated chapters dealing with supernovae In this second Edition the advances of recent years beyond one dimensional treatments of stellar structure and stellar explosions towards 3 dimensional models have been included and led to significant re writings in Chapters 3 5 The sections on the Solar System origins have been re written to account for new insights into the evolution of giant molecular clouds The chapter on diffuse radioactivities now also includes material measurements of radioactivities in the current solar system and their interpretations for recent nucleosynthesis activity in our Galaxy Significant new results on gamma rays from positron annihilations have been accounted for in that chapter and led to new links with nucleosynthesis sources as well as interstellar transport processes A new chapter now provides a description of interstellar processes often called chemical evolution thus linking the creation of new nuclei to their abundance observations in gas and stars The experimental instrumental chapters on nuclear reaction measurements on gamma ray telescopes and pre solar grain laboratories have

been updated Moreover new windows of astronomy that have been opened up in recent years have been included in the discussions of the multi messenger approach that broadens the basis for astrophysical insights **WHY ANYTHING - WHY NOT NOTHING: THE GOLDBLOCKS PARAGON** Captain Robert Cowley,2019-09-24 Captain Robert Cowley walked a deserted Pacific beach it was pre dawn dark and chilly Suddenly he heard a voice Robert look up He looked up and observed the faint glow of Mars and billions of stars The voice spoke again Why anything Why not nothing Cowley an archetypal on and off believer wrote Why Anything Why Not Nothing for atheists theists scientists evolutionists and more He asks are humans the remnants of a natural big bang that coalesced into a universe or might we be the creation of a supernatural God Asking difficult questions and challenging the bounds of human reason logic and intelligence he reviews Biblical science against modern science and the limitations inherent in matter he seeks to understand how and why we are here Cowley searches for answers in the cosmos and in the supernatural philosophy of two monotheistic religions Judaism and Christianity He ponders with amazing intelligible lucidity is evolution or God responsible for life **Born of Scourge** S. Jean,2024-02-27 Legends say when the skies grow dark and scourge starves the land a star will fall in order to save humanity Only when the star is sacrificed at the end of their journey will light return It s a cycle one humanity refuses to break because stars are plentiful and their sacrifices easier than learning the true nature of the scourge When Sol finally falls it s not because of humanity It s because he s had enough of watching his brethren be sacrificed He has one goal end humanity and end the cycle Unfortunately he has to pretend he cares before humans get wise It doesn t matter how soft the princess who catches him is Celena will be dead by the time his journey ends Nor how kind his assigned companions are the outgoing Mira with her ballads the brave Nebora with her axe and the hero Loren with his soft voice and friendly smile For centuries humanity has lied and their kindness is a ruse to bring about Sol s own destruction at the end of his tale He will not be fooled No one cares about the cries of the stars they ve destroyed over and over again and Sol will make sure this time humanity is the one sacrificed At least that s the plan until his traitorous heart begins to care for the humans he sought to eradicate

Astronomy with Radioactivities Roland Diehl,Dieter H. Hartmann,Nikos Prantzos,2010-10-02 This book introduces the reader to the field of nuclear astrophysics i e the acquisition and reading of measurements on unstable isotopes in different parts of the universe The authors explain the role of radioactivities in astrophysics discuss specific sources of cosmic isotopes and in which special regions they can be observed More specifically the authors address stars of different types stellar explosions which terminate stellar evolutions and other explosions triggered by mass transfers and instabilities in binary stars They also address nuclear reactions and transport processes in interstellar space in the contexts of cosmic rays and of chemical evolution A special chapter is dedicated to the solar system which even provides material samples The book also contains a description of key tools which astrophysicists employ in those particular studies and a glossary of key terms in astronomy with radioactivities **Stardust & Holly** Dorothy Middlebrook Shipman,1932 **Encyclopedia of Space and**
