BACKGROUND The ancient Greek word for drug has three meanings a cure or remedy a poison and a magical charm This book will consider these meanings in the modern sense drugs as medication and as a solution to problems drugs as dangerous to health and drugs as magical and hedonistic In the recent past policy and practice guidelines have often been based on a misunderstanding of the diversity and complexity of drug misuse Professionals have confused different types of drug misuse and or attempted to compress all types into one narrowly defined category i.e. all drugs are good or bad This is the first mistake it is preferable to go right back to the ancient Greeks and try to understand the range of different effects of drugs on different people Practitioners first of all need to understand the complexity of drug misuse in order to develop realistic concepts and construct useful categories for assessment After this they are in a position to identify clearly the main risks and problems in the different categories and so to determine which type of intervention is most appropriate *Bibliography on Drug Dependence and Abuse, 1928-1966*
