----- Disclaimer -----

This paper has been created based on the **most common** paper 1 topics from previous years. Due to the nature of some topics they are better suited to paper 1 as if you had a calculator, they would no longer be difficult to do. The paper should be excellent at helping students revise for exams, however, should not be relied upon as the basis for revision. The topics from this paper may well appear in the real exams, however there is absolutely no guarantee of this for the reasons previously mentioned. Some topics may appear, some may not.

Ultimately the best way to prepare for the exams is to **revise all topics**.

Captivating Technology Ruha Benjamin,2019-06-07 The contributors to Captivating Technology examine how carceral technologies such as electronic ankle monitors and predictive policing algorithms are being deployed to classify and coerce specific populations and whether these innovations can be appropriated and reimagined for more liberatory ends *Race on the Brain* Jonathan Kahn,2017-11-07 Of the many obstacles to racial justice in America none has received more recent attention than the one that lurks in our subconscious As social movements and policing scandals have shown how far from being postracial we are the concept of implicit bias has taken center stage in the national conversation about race Millions of Americans have taken online tests purporting to show the deep invisible roots of their own prejudice A recent Oxford study that claims to have found a drug that reduces implicit bias is only the starkest example of a pervasive trend But what do we risk when we seek the simplicity of a technological diagnosis and solution for racism What do we miss when we locate racism in our biology and our brains rather than in our history and our social practices In *Race on the Brain* Jonathan Kahn argues that implicit bias has grown into a master narrative of race relations one with profound if unintended negative consequences for law science and society He emphasizes its limitations arguing that while useful as a tool to understand particular types of behavior it is only one among several tools available to policy makers An uncritical embrace of implicit bias to the exclusion of power relations and structural racism undermines wider civic responsibility for addressing the problem by turning it over to experts Technological interventions including many tests for implicit bias are premised on a color blind ideal and run the risk of erasing history denying present reality and obscuring accountability Kahn recognizes the significance of implicit social cognition but cautions against seeing it as a panacea for addressing America s longstanding racial problems A bracing corrective to what has become a common sense understanding of the power of prejudice *Race on the Brain* challenges us all to engage more thoughtfully and more democratically in the difficult task of promoting racial justice **This Worldwide Struggle** Sarah Azaransky,2017 This work argues that the U S Civil Rights movement was part of a global wave of anti colonial and independence movements It reveals the international roots of the U S Civil Rights movement in the 1930s through the 1950s tracing the links between Gandhi and King Provided by the publisher **Volpe's Neurology of the**

Faith, Flourishing, and Agnosticism T. Ryan Byerly, 2023-11-19 Faith Flourishing and Agnosticism uses conceptual and empirical methods to argue that the many individuals who have ambiguous evidence for God can grow in virtue and attain greater flourishing by engaging in practices of faith toward God The book develops a way of thinking about God called minimal theism It argues that a sizeable number of people have ambiguous evidence for God and it provides support for arguments for agnosticism through an evaluation of theistic and atheistic arguments and higher order evidence about God It discusses what kind of cognitive commitments toward God are required to engage in faith practices such as thanking or praising God and develops unique arguments that these can be supplied by beliefs or non doxastic assumptions but not other states Four pathways whereby individuals with ambiguous evidence for God can grow in virtue through such faith practices are identified First they can grow in general virtuous tendencies to give other people the benefit of the doubt by giving God the benefit of the doubt Second they can indirectly grow in a broad range of virtues by experiencing better mental health as a consequence of accepting God's love Third they can make skilled use of the worldview of minimal theism to cultivate transformative experiences of awe and connectedness thereby supporting the specific virtue of spiritual excellence Finally by this same process they can reap further downstream benefits in character growth independently of whether spiritual excellence is virtuous
