John Deere 6068hf Fuel Consumption:

Fuel Consumption Calculator ,2007

Fuel Consumption Models for Tractors with Partial Drawbar Loads

Bryan J. Smith,2015 Three models for predicting fuel consumption for agricultural tractors with partial drawbar loads were compared Data were collected from eight John Deere tractors JD 7230R e23 7250R e23 7270R e23 7290R e23 7290R IVT 8320R 16 speed 8345RT IVT 8370R IVT The tractors were tested with 7 load levels per speed at four different travel speeds as close as possible to 4 7 5 10 and 13 km h 1 The IVT tractors were operated in Auto mode and the geared tractors were shifted up three gears and throttled back to the same travel speeds as the IVT tractors The 7 loads were selected at 30 40 50 60 70 75 and 80% of drawbar pull at maximum power at the selected speed Model 1 fuel consumption as a liner function of drawbar power currently used in OECD Code 2 Section 4 4 8 OECD 2014 resulted in a unique equation for each speed When the slopes for each tractor were compared 79% of the comparisons were not significantly different For 80% of the tractors the second variable in Models 2 and 3 were determined to be significant For 80% of the tractors Model 2 was determined to be more accurate than Model 3 While Model 1 was found to be more accurate than Model 2 the requirement of having a separate equation for each speed limits the practical application of Model 1 Model 2 had only slightly larger error than Model 1 but has the additional flexibility of being applicable over a range of speeds Fuel Consumption Calculator Canada.
