Individual Behaviors and Technologies for Financial Innovations Wesley Mendes-Da-Silva, 2018-07-26 This book offers comprehensive examination of research on the relevance of individual behavior and technology to financial innovations. The chapters cover current topics in finance including integrated reporting, people finance, crowdfunding, and corporate networks. It provides readers with an organized starting point to explore individual behaviors and new technologies used in financial innovations. The explicit and growing speed of the spread of new technologies has hastened the emergence of innovation in the field of finance. Topics like the Internet of Things, semantic computing, and big data finance are motivating the construction of financial tools that translate into new financial mechanisms. This book strives to help readers better understand the dynamic of the changes in financial systems and the proliferation of financial products. **Individual Behaviors and Technologies for Financial Innovations** is organized in 16 chapters organized in three parts. Part I has eight chapters that review the research on gender differences in attitudes about risk and propensity to purchase automobile insurance, financial literacy models for college students, wellness and attitude of university students in the use of credit cards, impact of programs, income distribution, and propensity to remain in employment, financial literacy and propensity to resort to informal financing channels, risk behavior in the use of credit cards by students. Part II reviews the research on financing for startups and SMEs, exploring funding through crowdfunding, platform operating credit unions, and using networks of friends to finance small businesses outside the domestic market. The four chapters of Part III describe contexts of financial innovation in listed companies, including society's demands on their behavior; we discuss motivations for companies to participate in corporate sustainability indexes, corporate performance through their profile of socially responsible investments, influence of networks of social relations in the formation of boards and management of companies, and also the precariousness of financial decisions in large companies as well as the role of the internet in corporate communication with the market. **Minerals Yearbook** Geological Survey, Interior Department, Mines Bureau, 2019-02-15 This volume covering metals and minerals contains chapters on approximately 90 commodities. In addition, this volume has chapters on mining and quarrying trends and on statistical surveying methods used by Minerals Information, plus a statistical summary. **Research Handbook on Law and Courts** Susan M. Sterett, Lee Demetrius Walker, 2019 The **Research Handbook on Law and Courts** provides a systematic analysis of new work on courts as governing institutions. Authors consider how courts have taken on regulating fundamental categories of inclusion and exclusion, including citizenship rights. Courts' centrality to governance is addressed in sections on judicial processes, sub-national courts, and political accountability, all analyzed in multiple legal-political systems. Other chapters turn to analyzing the worldwide push for diversity in staffing courts. Finally, the digitization of records changes both court processes and studying courts. Authors included in the Handbook discuss theoretical, empirical, and methodological approaches to studying courts as governing institutions. They also identify promising areas of future research. **Handbook**
