Carter, 2022-01-27 This book considers the relationship between proportionality and facts in constitutional adjudication Analysing where facts arise within each of the three stages of the structured proportionality test suitability necessity and balancing it considers the nature of these facts vis vis the facts that arise in the course of ordinary litigation The book's central focus is on how proportionality has been applied by courts in practice and it draws on the comparative experience of

four jurisdictions across a range of legal systems The central case study of the book is Australia where the embryonic and contested nature of proportionality means it provides an illuminating study of how facts can inform the framing of constitutional tests The rich proportionality jurisprudence from Germany Canada and South Africa is used to contextualise the approach of the High Court of Australia and to identify future directions for proportionality in Australia at a time when the doctrine is in its formative stages The book has three broad aims First it considers the role of facts within proportionality reasoning Second it offers procedural insights into fact finding in constitutional litigation Third the book's analysis of the dynamic Australian case law on proportionality means it also serves to clarify the nature and status of proportionality in Australia at a critical moment Since the 2015 decision of *McCloy v New South Wales* where four justices supported the introduction of a structured three part test of proportionality the Court has continued to disagree about the utility of such a test These developments mean that this book with its doctrinal and comparative approach is particularly timely

Bickel,Hendrik Kolvenbach,Philip Arm ,Gabriela Ligeza,2024-11-18 Sustainable exploration of the solar system requires a large amount of material and propellant to be transported out of Earth's gravity well and onwards to their destination Despite recent advances in lowering launch

costs transferring material from Earth to space is still very costly It still amounts to several thousand to tens of thousands of Euros per kilogram to low earth orbit and transportation to the Moon and Mars even a multiple of that There is an abundance of resources in our solar system that can be utilized to reduce the material required to be launched from Earth significantly Among these resources are water ice hydrates metals regolith rare earth elements chemical compounds volatiles and rare isotopes Utilizing these space resources would enable e g consumable and propellant production in space manufacturing or the construction of large structures which would otherwise be very expensive or not possible at all with material launched from Earth Lunar regolith for example contains iron and titanium that could be used to produce spacecraft components or structural elements for a lunar base while oxygen released from oxide minerals could be used for respiration or as a propellant In addition water ice could be extracted from regolith and used for consumption or agricultural applications

Although there have been numerous missions to the Moon there are still a lot of unknowns concerning its surface making it difficult to know where to look for resources and how to extract them

A Model Civil Procedure Code for England and Wales John Sorabji, 2024-10-14 Civil procedure law is integral to our understanding of access routes to justice dispute resolution and ultimately the rule of law However the field is rapidly changing shifting dispute resolution away from courts and judgments towards other legal pathways such as negotiation mediation arbitration and Ombudsman Similarly the increasing digitisation of society and looming potential of AI will profoundly influence future reforms Civil justice is thus at a critical turning point In response John Sorabji proposes a new model civil procedure code for England and Wales Building on

the work of the ALI UNIDROIT Principles of Transnational Civil Procedure and the ELI UNIDROIT Model European Rules of Civil Procedure he articulates a simplified principle based seventeen part approach that covers all major stages from issue to enforcement with sections on costs and funding provisional measures access to evidence and privileges case statements hearings and dispute management Highlighting that civil courts are just one part of a wider civil justice ecosystem Sorabji promotes the wealth of avenues available for dispute resolution and charts how these should be co ordinated in the future He outlines new ways to efficiently incorporate breakthroughs in digitisation and preventive and consensual forms of justice and also explores likely shifts in the purpose of procedural codes as digitisation evolves while underscoring the consistent need for judicial independence and accountability Ultimately Sorabji posits that procedural codes should guide not only the process of litigation but those who design digital procedures and test their propriety in the future **Hough's**
