Mathematical Methods and Models in Economic Planning, Management and Budgeting Galimkair Mutanov, 2014-11-04

This book describes a system of mathematical models and methods that can be used to analyze real economic and managerial decisions and to improve their effectiveness. Application areas include management of development and operation budgets, assessment and management of economic systems using an energy entropy approach, equation of exchange rates and forecasting foreign exchange operations, evaluation of innovative projects, monitoring of governmental programs, risk management of investment processes, decisions on the allocation of resources and identification of competitive industrial clusters. The proposed methods and models were tested on the example of Kazakhstan's economy but the generated solutions will be useful for applications at other levels and in other countries. Regarding your book *Mathematical Methods and Models in Economics*, I am impressed because now it is time when econometrics is becoming more appreciated by economists and by schools that are the hosts or employers of modern economists. Your presented results really impressed me. John F Nash Jr, Princeton University Nobel Memorial Prize in Economic Sciences. The book is within my scope of interest because of its novelty and practicality. First, there is a need for realistic modeling of complex systems both natural and artificial that conclude computer and economic systems. There has been an ongoing effort in developing models dealing with complexity and incomplete knowledge. Consequently, it is clear to recognize the contribution of Mutanov to encapsulate economic modeling with emphasis on budgeting and innovation. Secondly, the method proposed by Mutanov has been verified by applying to the case of the Republic of Kazakhstan with her vibrant emerging economy. Thirdly, Chapter 5 of the book is of particular interest for the computer technology community because it deals with innovation. In summary, the book of Mutanov should become one of the outstanding recognized pragmatic guides for dealing with innovative systems. Andrzej Rucinski, University of New Hampshire. This book is unique in its theoretical findings and practical applicability. The book is an illuminating study based on an applied mathematical model which uses methods such as linear programming and input output analysis. Moreover, this work demonstrates the author's great insight and academic brilliance in the fields of finance, technological innovations and marketing vis vis the market economy. From both theoretical and practical standpoint, this work is indeed a great achievement. Yeon Cheon Oh, President of Seoul National University.

Gender and Judging Ulrike Schultz, Gisela Shaw, 2014-07-18. Does gender make a difference to the way the judiciary works and should work? Or is gender blindness a built-in prerequisite of judicial objectivity? If gender does make a difference, how might this be defined? These are the key questions posed in this collection of essays by some 30 authors from the following countries: Argentina, Cambodia, Canada, England, France, Germany, India, Israel, Italy, Ivory Coast, Japan, Kenya, the Netherlands, the Philippines, South Africa, Switzerland, Syria and the United States. The contributions draw on various theoretical approaches including gender feminist and sociological theories. The book's pressing topicality is underlined by the fact that well into the modern era, male

opposition to women's admission to and progress within the judicial profession has been largely based on the argument that their very gender programmes women to show empathy partiality and gendered prejudice in short essential qualities running directly counter to the need for judicial objectivity It took until the last century for women to begin to break down such seemingly insurmountable barriers And even now there are a number of countries where even this first step is still waiting to happen In all of them there remains a more or less pronounced glass ceiling to women's judicial careers
