Spaceman Clayton C. Anderson,2015-06-01 What s it like to travel at more than 850 MPH riding in a supersonic T 38 twin turbojet engine airplane What happens when the space station toilet breaks How do astronauts take out the trash on a spacewalk tightly encapsulated in a space suit with just a few layers of fabric and Kevlar between them and the unforgiving vacuum of outer space The Ordinary Spaceman puts you in the flight suit of U S astronaut Clayton C Anderson and takes you on the journey of this small town boy from Nebraska who spent 167 days living and working on the International Space

Station including more than forty hours of space walks Having applied to NASA fifteen times over fifteen years to become an astronaut before his ultimate selection Anderson offers a unique perspective on his life as a veteran space flier one characterized by humility and perseverance From the application process to launch aboard the space shuttle Atlantis from serving as a family escort for the ill fated Columbia crew in 2003 to his own daily struggles family separation competitive battles to win coveted flight assignments the stress of a highly visible job and the ever present risk of having to make the ultimate sacrifice Anderson shares the full range of his experiences With a mix of levity and gravitas Anderson gives an authentic view of the highs and the lows the triumphs and the tragedies of life as a NASA astronaut

Parallel Computing: On the Road to Exascale Gerhard R. Joubert, Hugh Leather, Mark Parsons, Frans Peters, 2016-04-15 As predicted by Gordon E Moore in 1965 the performance of computer processors increased at an exponential rate Nevertheless the increases in computing speeds of single processor machines were eventually curtailed by physical constraints This led to the development of parallel computing and whilst progress has been made in this field the complexities of parallel algorithm design the deficiencies of the available software development tools and the complexity of scheduling tasks over thousands and even millions of processing nodes represent a major challenge to the construction and use of more powerful parallel systems This book presents the proceedings of the biennial International Conference on Parallel Computing ParCo2015 held in Edinburgh Scotland in September 2015 Topics covered include computer architecture and performance programming models and methods as well as applications The book also includes two invited talks and a number of mini symposia Exascale computing holds enormous promise in terms of increasing scientific knowledge acquisition and thus contributing to the future well being and prosperity of mankind A number of innovative approaches to the development and use of future high performance and high throughput systems are to be found in this book which will be of interest to all those whose work involves the handling and processing of large amounts of data
