helps readers better understand why issues of diversity and difference are so highly contested in the United States and across the globe Vavrus incorporates specific education examples throughout the text to examine six contested areas race and ethnicity socioeconomic class and culture multicultural and ethnic studies language religion and sexuality and gender In each of these areas the author explores how contrasting worldviews found in social conservatism liberal multiculturalism and critical multiculturalism influence our understandings about difference and diversity and the education policies we develop as a result Diversity and Education is designed to help educators move beyond the how can they believe that knee jerk reaction toward a more informed strategic understanding of belief systems and political affiliations Book Features Brings a contemporary 21st century perspective to differing political orientations toward diversity and education Examines outcomes of diversity debates on children of color the poor immigrants women and sexual and religious minorities Uses critical pedagogy with a historical and political economy lens to explain current diversity issues in education Critiques the diversity stance of new national teacher education standards from the Council for Accreditation of Educator Preparation Diversity and Education can not only help us have conversations about racism institutionalized oppression and cultural fear it can also offer an intervention that can move readers towards a deeper critical consciousness about diversity and multicultural education in their own lives From the Foreword by Wayne Au associate professor at the University of Washington Bothell and an editor for Rethinking Schools Few education scholars have offered as potent and cogent a political and economic analysis of multicultural education and diversity as Professor Michael Vavrus has in his new book His critique of neoliberalism via critical pedagogy and his advocacy of social justice education are timely and praiseworthy Ramin Farahmandpur professor Graduate School of Education Portland State University Diversity and Education is a must read for anyone concerned about why so many policies claiming to help diverse students fail and what alternatives exist Vavrus clearly believes in the power of teachers who are well educated critical thinkers In this lucid and compelling text he skillfully applies a highly useful framework to unpack historical and contemporary debates about core concepts underlying multiple struggles for education and rights Christine Sleeter professor emerita California State University Monterey Bay Mobile Museums Felix Driver ,Mark Nesbitt,Caroline Cornish,2021-04-19 Mobile Museums presents an argument for the importance of circulation in the study of museum collections past and present It brings together an impressive array of international scholars and curators from a wide variety of disciplines including the history of science museum anthropology and postcolonial history to consider the mobility of collections The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re mobilisation notably in the context of Indigenous community engagement Contributors seek to explore processes of circulation historically in order to re examine inform and unsettle common assumptions about the way museum collections have evolved over time and through space By foregrounding questions of circulation the chapters in Mobile Museums collectively represent a fundamental shift in the understanding of the history and future uses of

museum collections The book addresses a variety of different types of collection including the botanical the ethnographic the economic and the archaeological Its perspective is truly global with case studies drawn from South America West Africa Oceania Australia the United States Europe and the UK Mobile Museums helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to matter today Praise for Mobile Museums This book advances a paradigm shift in studies of museums and collections A distinguished group of contributors reveal that collections are not dead assemblages The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism travel and the history of knowledge and have implications for the remobilisation of museums in the future Nicholas Thomas University of Cambridge The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re mobilisation Arthur MacGregor      *Programming Language Cultures* Brian Lennon,2024-08-27 In this book Brian Lennon demonstrates the power of a philological approach to the history of programming languages and their usage cultures In chapters focused on specific programming languages such as SNOBOL and JavaScript as well as on code comments metasyntactic variables the very early history of programming and the concept of DevOps Lennon emphasizes the histories of programming languages in their individual specificities over their abstract formal or structural characteristics viewing them as carriers and sometimes shapers of specific cultural histories The book s philological approach to programming languages presents a natural sensible and rigorous way for researchers trained in the humanities to perform research on computing in a way that draws on their own expertise Combining programming knowledge with a humanistic analysis of the social and historical dimensions of computing Lennon offers researchers in literary studies STS media and digital studies and technical fields the first technically rigorous approach to studying programming languages from a humanities based perspective

**Human Behavior in the Social Environment** Anissa Taun Rogers,2016-02-26 The fourth edition of Human Behavior in the Social Environment takes a life course perspective to give a concise compact treatment of human behavior This edition includes the DSM 5 the 2015 EPAS competencies and a new chapter that explores the future of social work and some of the emerging issues facing the profession The text also comes with a rich companion website that includes support materials and six unique cases that encourage students to learn by doing and to apply their knowledge of human behavior to best practices Go to [www.routledgesw.com](http://www.routledgesw.com) to explore the cases and additional resources      **Proteins, Pathologies and Politics** David Gentilcore,Matthew Smith,2018-12-13 Proteins Pathologies and Politics presents an international and historical approach to dietary change and health contrasting current concerns with how issues such as diabetes cancer vitamins sugar and fat and food allergies were perceived in the 19th and 20th centuries Though what we eat and what we shouldn t eat has become a topic of increased scrutiny in the current century the link between dietary innovation and health disease is not a new one

From new fads in foodstuffs through developments in manufacturing and production processes to the inclusion of additives and evolving agricultural practices changing diet changes often promised better health only to become associated with the opposite. With contributors including Peter Scholliers, Francesco Buscemi, Clare Gordon, Bettencourt, and Kirsten Gardner, this collection comprises the best scholarship on how we have perceived diet to affect health. The chapters consider the politics and economics of dietary change, the historical actors involved in dietary innovation, and the responses to it, the extent that our dietary health itself is a cultural construct or even a product of history. This is a fascinating and varied study of how our diets have been shaped and influenced by perceptions of health and will be of great value to students of history, food history, nutrition, science, politics, and sociology.

*Breaking Point* Rebecca Schwartz Greene, 2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK. This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II. *Breaking Point* is the first in-depth history of American psychiatry in World War II. Drawn from unpublished primary documents, oral histories, and the author's personal interviews and correspondence over years with key psychiatric and military policymakers, it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations. Ultimately, 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds. Never before or since has the United States engaged in such a program. In designing Selective Service Medical Circular No. 1, psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter. While many American and European psychiatrists questioned this belief, and huge numbers of American psychiatric casualties soon raised questions about screening's validity, psychiatric and military leaders persisted. In 1942 and 1943, in endorsing ever tougher screening, and little else. Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs, and Blacks and Native Americans among others complained of bias. A frustrated General George S. Patton famously slapped two malingering neuropsychiatric patients in Sicily, a sentiment shared by Marshall and Eisenhower though they favored a tamer style. Yet psychiatric rejections, evacuations, and discharges mounted. While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943, this was the exception. But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself, not predisposition, precipitated breakdown, leading military psychiatrists switched their emphasis from screening to prevention and treatment. But this switch was too little, too late, and slowed by a year-long series of Inspector General investigations, even while numbers of psychiatric casualties soared. Ironically, despite and even partly because of psychiatrists' wartime performance plus the emotional toll of war, postwar America soon witnessed a dramatic growth in numbers, popularity, and influence of the profession, culminating in the National Mental Health Act of 1946. But veterans with PTSD, not recognized until 1980, were largely neglected.

**Чипова війна** Кріс Міллер, 2024-08-15      **The Closing of the Liberal Mind** Kim R. Holmes, 2017-12-12 A former U S Assistant Secretary of State and currently Acting Senior Vice President for Research at The Heritage Foundation Kim R Holmes surveys the state of liberalism in America today and finds that it is becoming its opposite illiberalism abandoning the precepts of open mindedness and respect for individual rights liberties and the rule of law upon which the country was founded and becoming instead an intolerant rigidly dogmatic ideology that abhors dissent and stifles free speech Tracing the new illiberalism historically to the radical Enlightenment a movement that rejected the classic liberal ideas of the moderate Enlightenment that were prominent in the American Founding Holmes argues that today's liberalism has forsaken its American roots incorporating instead the authoritarian anti clerical and anti capitalist prejudices of the radical and largely European Left The result is a closing of the American liberal mind Where once freedom of speech and expression were sacrosanct today liberalism employs speech codes trigger warnings boycotts and shaming rituals to stifle freedom of thought expression and action It is no longer appropriate to call it liberalism at all but illiberalism a set of ideas in politics government and popular culture that increasingly reflects authoritarian and even anti democratic values and which is

devising new strategies of exclusiveness to eliminate certain ideas and people from the political process Although illiberalism has always been a temptation for American liberals lurking in the radical fringes of the Left it is today the dominant ideology of progressive liberal circles This makes it a new danger not only to the once venerable tradition of liberalism but to the American nation itself which needs a viable liberal tradition that pursues social and economic equality while respecting individual liberties

*The Chronology of Revolution* Ben Harker, 2020 Based on a decade of research in over twenty archives The Chronology of Revolution is an accessible and richly detailed work of historical and cultural analysis that fixes its gaze on the legacy of the Communist Party of Great Britain Communists anticipated that the party formed in the world's first industrialised nation would be in the vanguard of world revolution Instead the party never came close to matching the political power of the British Labour Party or continental Communist parties in France or Italy and dissolved itself in 1991 In this book Ben Harker draws on the ideas of Antonio Gramsci to argue that the CPGB despite having great influence over British culture never fully appreciated the importance of civil society to its political strength Analysing members' efforts in fields such as science journalism the arts broadcasting and education The Chronology of Revolution offers an alternative radical history of Britain between 1920 and 1991 which draws out important lessons for the contemporary Left

*The Rocket Lab* Michael G. Smith, 2023-05-15 The Rocket Lab Maurice Zucrow Purdue University and America's Race to Space focuses on the golden era of space exploration between 1946 and 1966 specifically the life and times of Purdue University's Dr Maurice J Zucrow a pioneering teacher and researcher in aerospace engineering Zucrow taught America's first university course in jet and rocket propulsion wrote the field's first textbook and established the country's first educational Rocket Lab He was part of a small circle of innovators who transformed Purdue into the country's largest engineering university which became a cradle of astronauts Taking a chronological and thematic approach The Rocket Lab weaves between the local and national drawing in rival universities especially Harvard MIT Princeton and Caltech Also covered is Zucrow's role in the national project system of research and development through World War II and the Cold War At Aerojet he was one of the country's original project engineers dedicated to scientific technical expertise and the stepwise approach He made vanguard power plant contributions to the Northrop Flying Wing as well as the Corporal Nike and Atlas missiles among others Zucrow's work in propulsion helped to improve the country's arsenal of ballistic missiles and space launchers and as a teacher he educated the first generation of aerospace engineers This book elevates Zucrow and the central role he played in getting the United States to space
