In the 1930s George Placzek was known as an adventurous person with a sharp sense of humor, a tireless generator of novel physics ideas which he generously shared with his colleagues. Born in Brno, now Czech Republic, into a wealthy Jewish family, he lost all his relatives to Holocaust, casting a tragic shadow on his life. Placzek's scientific career began in the late 1920s when the quantum revolution was almost over but nuclear physics was still at its infancy. He established personal and scientific relations with the creators of quantum mechanics such as Heisenberg in Leipzig and Niels Bohr in Copenhagen. In Rome he worked with Fermi and in Copenhagen he became a part of Bohr's nuclear physics team which dominated nuclear theory at that time. The scope of Placzek's pilgrimage around world physics centers in the 1930s was unique among his colleagues. In January 1939 George Placzek managed to emigrate from Europe to the US and became a part of the British Mission within the Manhattan Project. His physical insights were instrumental in advancing from the basic discoveries on nuclear chain reactions to the Trinity experiment, Hiroshima and Nagasaki. This book is a unique compilation of a large number of previously unknown and unpublished documents from private and university archives, police reports, etc. Placzek's correspondence with the leadership of the Hebrew University in 1934, the 1937 NKVD interrogation files of Konrad Weisselberg, recollections of Ella Andriess as well as the Zurich Police report of 1956 detailing the circumstances of Placzek's death in a Zurich hotel are illuminating as they shed light on poorly known pages of his life. *Rain of Ruin* Richard Overy, 2025-03-04 A leading historian of World War II sheds new light on the purposes and impact of the US incendiary and atomic bombing of Japan's cities in 1945. With the development of the B-29 Superfortress in summer 1944, strategic bombing, a central component of the Allied war effort against Germany, arrived in the Pacific theater. In 1945 Japan experienced the three most deadly bombing attacks of the war. The firebombing of Tokyo in March burned the city's most densely populated sector, killed some 85,000 residents and left more than one million homeless. The attack was part of a months-long campaign of incendiary bombing that destroyed almost two-thirds of Japan's cities. The two atomic blasts in August killed hundreds of thousands in Hiroshima and Nagasaki, most of them civilians. The bombing brought a destabilizing devastation that combined with a declaration of war by the Soviet Union induced Japan as they put it to terminate the war. Many at the time and since have credited American air power and especially the two atomic bombs with Japan's surrender. But Richard Overy tells a different, more dimensional story. Drawing on his expertise on the war and its bombing campaigns, he delivers a precise recounting of these aerial attacks and a

balanced informed assessment of how and why they occurred Overy is astute on the Allied decision making and notably integrates the Japanese leadership as well He ably navigates the dramatic endgame of the war which featured factional infighting within the Japanese cabinet a scramble by American officials to formulate an acceptable version of unconditional surrender and the crucial role played by the emperor Hirohito The atomic bombing emerges as impactful but not decisive in this rich multilayered history *Morality's Muddy Waters* George Cotkin,2011-06-06 In the face of an uncertain and dangerous world Americans yearn for a firm moral compass a clear set of ethical guidelines But as history shows by reducing complex situations to simple cases of right or wrong we often go astray In *Morality's Muddy Waters* historian George Cotkin offers a clarion call on behalf of moral complexity Revisiting several defining moments in the twentieth century the American bombing of civilians during World War II the My Lai massacre racism in the South capital punishment the invasion of Iraq Cotkin chronicles how historical figures have grappled with the problem of evil and moral responsibility sometimes successfully oftentimes not In the process he offers a wide ranging tour of modern American history Taken together Cotkin maintains these episodes reveal that the central concepts of morality evil empathy and virtue are both necessary and troubling Without empathy for example we fail to inhabit the world of others with it we sometimes elevate individual suffering over political complexities For Cotkin close historical analysis may help reenergize these concepts for ethical thinking and acting *Morality's Muddy Waters* argues for a moral turn in the way we study and think about history maintaining that even when answers to ethical dilemmas prove elusive the act of grappling with them is invaluable
