Preparation and Development of School Leaders in Africa Pontso Moorosi, Tony Bush, 2019-11-28 The book is based on African research and reviews on school leadership preparation and development taking stock of where the field is in this geographical region and what lies ahead The exclusive focus on sub-Saharan African countries is driven by the desire to foreground African experiences highlighting gaps and asking critical questions about contextually relevant models of leadership that can drive towards improved educational outcomes for African children The countries explored include Botswana Cameroon Ghana Kenya Lesotho Namibia Nigeria South Africa and Tanzania Written by a collective of seasoned researchers with extensive experience in the field and on the continent this volume is timely as the field is in need of serious political attention For these reasons the book is an important resource for policy makers school leaders and other practitioners students educators of school leadership preparation programmes as well as researchers in the field on the continent and the diaspora

Globalisation and Education Policy Reform in Botswana Richard Tabulawa, 2023-07-21 This book uses the global local dialect approach to explicate education policy reform in Botswana and interrogates the practical effects of the various education policies on curriculum pedagogy and governance of the Botswana General Education system Considering the effect of three reform policies since Botswana's Independence in 1966 the book evaluates the performance of each of the policies and examines their consequences in terms of the interplay of global forces and domestic pressures The result of this interplay has been an education landscape that while reflecting globally circulating education discourses markedly differs from those same discourses The book argues that the State in Botswana has appropriated education policy to legitimate itself in times of crisis and that each policy has improved access to general education but collectively have failed to improve its quality making suggestions for how this can be improved in the future As the first book of its kind to delve into education in Botswana from a single authored critical lens the book will be a highly relevant reading for academics researchers and post graduate students of African education comparative education education policy and curriculum studies

The Praeger International Handbook of Special Education Michael L. Wehmeyer, James R. Patton, 2017-06-15 This handbook provides a concise overview of special education services in countries across the world using the Article on Education in the United Nations Convention on the Rights of Persons with Disabilities as the analytical frame The Praeger International Handbook of Special Education presents a concise and clear overview of special education services in more than 70 countries across the world using the Article on Education in the United Nations Convention on the Rights of Persons with disabilities as the analytical frame Each chapter offers information about the country in general followed by sections on the public education system the private education system the special education system teacher training requirements and barriers to and promising trends in inclusive and special education The volumes

and chapters are organized by the United Nations Geoscheme with Volume 1 including an overview of the volumes and chapters on countries in the Americas Volume 2 addressing countries from Europe and Africa and Volume 3 focusing on countries in Asia and Oceania This is the most complete exploration of the delivery of supports and services to children and youth with disabilities across the globe available The volumes do not compare among or between countries but rather provide a baseline for understanding current special education practices and their relationship with general education and inclusive practices across the globe Readers will come away with an in depth understanding of what is happening with regard to the implementation of special education services and Article 24 of the Convention for the Rights of People with Disabilities This valuable reference set serves researchers graduate students and policymakers in special and general education as well as professionals focused on issues of education worldwide and scholars focused on international special education As such this handbook will be an important reference source for university libraries professional associations and policy entities

Current Challenges in Cardiovascular Molecular Diagnostics Matteo Vatta,Valeria Novelli,Luisa Mestroni,Jeffrey A. Towbin,Carlo Napolitano,Guia Guffanti,2017-09-12 The field of cardiovascular genetics has tremendously benefited from the recent application of massive parallel sequencing technology also referred to as next generation sequencing NGS However along with the discovery of additional genes associated with human cardiac diseases the analysis of large dataset of genetic information uncovered a much more complex and variegated landscape which often departs from the comfort zone of the monogenic Mendelian diseases image that clinical molecular geneticists have been well acquainted with for many decades It is now clear that in addition to highly penetrant genetic variants which in isolation are able to recapitulate the full clinical presentation when expressed in animal models we are now aware that a small but significant fraction of subjects presenting with cardiac muscle diseases such as cardiomyopathies or primary arrhythmias such as long QT syndrome LQTS may harbor at least two deleterious variants in the same gene compound heterozygous or in different gene double heterozygous Although the clinical presentation in subjects with more than one deleterious variant appears to be more severe and with an earlier disease onset it somehow changes the viewpoint of clinical molecular geneticists whose aim is to identify all possible genetic contributors to a human condition In this light the employment in clinical diagnostics of the NGS technology allowing the simultaneous interrogation of a DNA target spanning from large panel of genes up to the entire genome will definitely aid at uncovering all such contributors which will have to be tested functionally to confirm their role in human cardiac conditions The uncovering of all clinically relevant deleterious changes associated with a cardiovascular disease would probably increase our understanding of the clinical variability commonly occurring among affected family relatives and potentially provide with unexpected therapeutic targets for the treatment of symptoms related to the presence of accessory deleterious genetic variants other than the key molecular culprit The objective of this Research Topic is to explore the current challenges presenting to the cardiovascular genetics providers such as clinical geneticists genetic

counselors clinical molecular geneticists and molecular pathologists involved in the diagnosis counseling testing and interpretation of genetic tests results for the comprehensive management of patients affected by cardiovascular genetic disorders

Proceedings of the 7th International Conference on the Applications of Science and Mathematics

2021 Aida Binti Mustapha, Suhadir Shamsuddin, Syed Zuhair Haider Rizvi, Saliza Binti Asman, Siti Suhana Jamaian, 2022-06-28 This book presents peer reviewed articles and recent advances on the potential applications of Science and Mathematics for future technologies from the 7th International Conference on the Applications of Science and Mathematics SCIE MATHIC 2021 held in Malaysia It provides an insight about the leading trends in sustainable Science and Technology The world is looking for sustainable solutions to problems more than ever The synergistic approach of mathematicians scientists and engineers has undeniable importance for future technologies With this viewpoint SCIE MATHIC 2021 has the theme Quest for Sustainable Science and Mathematics for Future Technologies The conference brings together physicists mathematicians statisticians and data scientists providing a platform to find sustainable solutions to major problems around us The works presented here are suitable for professionals and researchers globally in making the world a better and sustainable place

International Conference on Multi disciplinary Technologies and challenges in Industry 4.0 Dr. Prakash s, dr. Silvia liberataullo, dr. Yogesh g s, dr. I manimozhi, prof. Shilpa patil., *Intelligent Computing* Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2018-11-01 This book gathering the Proceedings of the 2018 Computing Conference offers a remarkable collection of chapters covering a wide range of topics in intelligent systems computing and their real world applications The Conference attracted a total of 568 submissions from pioneering researchers scientists industrial engineers and students from all around the world These submissions underwent a double blind peer review process Of those 568 submissions 192 submissions including 14 poster papers were selected for inclusion in these proceedings Despite computer science s comparatively brief history as a formal academic discipline it has made a number of fundamental contributions to science and society in fact along with electronics it is a founding science of the current epoch of human history the Information Age and a main driver of the Information Revolution The goal of this conference is to provide a platform for researchers to present fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences This book collects state of the art chapters on all aspects of Computer Science from classical to intelligent It covers both the theory and applications of the latest computer technologies and methodologies Providing the state of the art in intelligent methods and techniques for solving real world problems along with a vision of future research the book will be interesting and valuable for a broad readership
