Husband, Jonathan F. Husband, 2009-07-30 A guide to series fiction lists popular series identifies novels by character and offers guidance on the order in which to read unnumbered series *The Risk Controllers* Peter Norman, 2011-09-07 Clearing houses or CCPs were among the very few organisations to emerge from the global financial crisis with their standing enhanced In the chaotic aftermath of the bankruptcy of Lehman Brothers they successfully completed trades worth trillions of dollars in a multitude of financial instruments across listed and over the counter markets and so helped avert financial Armageddon That success transformed the business of clearing Governments and regulators around the world gave CCPs and the clearing services they provide a front line role in protecting the global economy from future excesses of finance CCPs which mitigate risk in financial markets responded by greatly expanding their activities notably in markets for over the counter derivatives and often in fierce competition with one another In *The Risk Controllers* journalist and author Peter Norman describes how CCPs operate how they handled the Lehman default and the challenges they now face Because central counterparty clearing is a complex business with a long history that continues to

influence decisions and structures even in today's fast changing world. The Risk Controllers explores the development of CCPs and clearing from the earliest times to the present. It draws on the experiences of the people who helped to shape the business of clearing today. It sets the development of CCPs and clearing in the broader context of changes in society, politics and regulation. The book examines turning points such as the 1987 stock market crash that set clearing on a new path and the impact of long running trends including the exponential growth of computer power and the ebb and flow of globalisation. Written in non technical language, The Risk Controllers provides a unique and accessible guide to CCPs and clearing. It is essential reading for clearing professionals, legislators and regulators whose job it is to take this vitally important business into the future. The recent crisis has thankfully renewed interest in the importance of central counterparties, how they can help preserve stability or as Hong Kong showed in 1987, undermine stability if they are not super sound. Peter Norman's book places the role of clearing houses in a historical context and explains why the financial system's plumbing matters so much. It should be read by anyone interested in building safer capital markets. Paul Tucker, Deputy Governor, Financial Stability Bank of England.

Colossal Control Failures Jack P. Gibbs, 2015-11-17. This fascinating book analyzes 13 control failures in human history from Robespierre's promotion of the French Revolution to Hoover's efforts to stop the Great Depression to the intelligence failures of 9/11. Assessing the causes of 10 additional historical cases, the author's comparative analysis shows how each leadership failure was caused by an expansion of the range of control attempts, their scope and/or their diversity. A leader's or other actor's attempts to broaden the range of control targets have been most important in causing great human failures. The analysis is timely during an era when war, global warming and other vexing problems plague our society.

Intercultural Modes of Philosophy, Volume One Eli Kramer, 2021-08-30. Until rather recently, philosophy when practiced as a way of life was for most a communal enterprise of mutually reinforced personal cultivation. In these times of social isolation, including in academic philosophy itself, it is time yet again to revitalize this lost but vital intercultural mode of philosophy. This volume characterizes a neglected communal mode of philosophy, the philosophical community, by describing the constellation of metaethical principles, general axiological, cultural and dialectical, that cultivates its values. The book draws on examples from across the globe and history, including interviews of adherents of living philosophical communities.
