The Mobile Learning Voyage - From Small Ripples to Massive Open Waters Tom H. Brown, Herman J. van der Merwe, 2015-10-14 This book constitutes the proceedings of the 14th International Conference on Mobile and Contextual Learning mLearn 2015 held in a cruise ship leaving from and arriving to Venice Italy in October 2015 The 22 revised full papers and 6 short papers presented were carefully reviewed and selected from 81 submissions The papers deal with the topics related to the theme of the conference The mobile learning voyage from small ripples to massive open waters The conference theme paid tribute to the developments that brought mobile learning from its infancy steps in the early 2000s to maturity in 2015 while simultaneously paving the way for the broad and open waters ahead with new developments and progress in mobile learning and emerging ambient technologies ECRM2015-Proceedings of the 14th European Conference on Research Methods 2015 Dr Vincent Cassar, Dr Frank Bezzina, 2015-06-01 Complete proceedings of the 14th European Conference on Research Methodology for Business and Management Studies Valletta Malta Published by Academic Conferences and Publishing International **ICEL 2017 - Proceedings of the 12th International Conference on e-Learning** Laurie O. Campbell, Richard Hartshorn, 2017 **Decolonising Journalism Education in South Africa** Ylva Rodny-Gumede, Colin Chasi, Zubeida Jaffer, Mvuso Ponono, 2023-05-19 This book is the culmination of several years of collaborative work It is a unique contribution to the field of journalism because of the depth and variety of contributions it makes to the field The scholars who contribute to this volume respond to the great need to rethink journalism from various perspectives including journalism training research the contents of the news media language media ethics the safety of journalists and gender inequities in the news media In doing this they recognise how the societies that journalism address should themselves change Computational Science and Its Applications -- ICCSA 2015 Osvaldo Gervasi, Beniamino Murgante, Sanjay Misra, Marina L. Gavrilova, Ana Maria Alves Coutinho Rocha, Carmelo Torre, David Taniar, Bernady O. Apduhan, 2015-06-18 The five volume set LNCS 9155 9159 constitutes the refereed proceedings of the 15th International Conference on Computational Science and Its Applications ICCSA 2015 held in Banff AB Canada in June 2015 The 232 revised full papers presented in 22 workshops and a general track were carefully reviewed and selected from 780 initial submissions for inclusion in this volume They cover various areas in computational science ranging from computational science technologies to specific areas of computational science such as computational geometry and security **The (Im)possibility of Forgiveness** Dion Forster, 2019-09-10 The findings from this study go beyond biblical theological scholarship on forgiveness Dion Forster boldly succeeds in showing that creating conditions for deeper human connection transforms impossibility into possibility and shines a light on the face of the Other who can now be forgiven Pumla Gobodo Madikizela Professor and Research Chair of Historical Trauma and Transformation Stellenbosch University Dion Forster refuses to accept the conclusion that understandings of forgiveness may be so different and complex across social racial and

cultural groups in South Africa that actual forgiveness may be impossible Using Matthew 18 15 35 as a meeting ground he gathers ordinary Methodist Christians for cross cultural intergroup Bible reading He draws upon the philosophical integral theory of Ken Wilber the insights of intergroup contact theory and the methods of critical biblical exegesis to organize analyse and understand this encounter What emerges is a hopeful conclusion that differing conceptions of forgiveness its challenges and possibilities can be understood shared and perhaps actualized across social racial and cultural barriers Bruce C Birch Dean and Professor of Biblical Theology Wesley Theological Seminary Reading Dion Forster on the impossibility of forgiveness I was once again struck by our desperate need to learn more about ourselves and one another but also about the meaning of forgiveness in our respective communities This is an excellent example of the potential of Intercultural Bible Reading Forster not only makes an outstanding academic contribution with implications for New Testament studies Systematic and Public Theology but also for flesh and blood communities wrestling with the possibilities and perils of forgiveness Juliana Claassens Professor of Old Testament Studies and Head of Department Chair of the Gender Unit Stellenbosch University This book deals with contested and topical matters Biblical hermeneutics has always been contested how to read and understand Biblical passages Things become even more contested when such passages are read inter culturally they become even more contested when the words are about contested personal and social issues like Jesus words on forgiveness in Matthew 18 Empirical studies like this show how deeply contested such readings truly are in the context of South African churches with their painful histories of division and conflict Future academic work will therefore benefit from the creative and careful methodological approach developed in this study However this book offers much more than academic promise precisely because of the theme so topical today and without doubt topical for a long time to come and in many other places in our contemporary world as well Forster offers resources for reading and conversation for everyone concerned with public life today This is public theology in action showing how faith matters without prescribing answers but rather by invitation to join an informed discussion Dirk J Smit The Rimmer and Ruth deVries Professor of Reformed Theology and Public Life Princeton Theological Seminary

Ecology, Sustainable Development and Accounting Seleshi Sisaye, 2015-08-11 Accounting literature has viewed sustainability in terms of social economic and environmental performances There have been concerns that the relationship between sustainability accounting and organizational performance cannot be explained unless we can deduce patterns of administrative behaviour that chronicle management practices Ecology Sustainable Development and Accounting argues that despite the broader social and economic development dimensions of sustainability and the limitations of its extension to corporate and organizational behaviour an ecological framework is capable of providing the overall societal and community chronologies that describe corporate sustainable operations Drawing examples from international development and federal government organizations this book documents the link between ecology corporate sustainable development and sustainability accounting and reporting It draws

together the literature from several disciplines to elaborate the contribution of the ecological approach to sustainable development in the accounting literature This book will be of particular interest to students academics and practitioners in the areas of environmental studies ecological economics sustainable development studies and social and environmental accounting The sociological and anthropological perspectives make this book the first of its kind to apply the population ecology of sociology to both the sustainability and accounting literature **Hydrometallurgy** Suresh Bhargava,Mark Pownceby,Rahul Ram,2018-07-02 This book is a printed edition of the Special Issue Hydrometallurgy that was published in Metals **Assessing Academic Literacy in a Multilingual Society** Albert Weideman,John Read,Theo du Plessis,2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience Sustainable Design Tomayess Issa,Pedro Isaias,2015-10-13 This book is concerned with the importance of Human Computer Interaction HCI Usability user participants and Sustainability in the Information Communication Technology ICT industry throughout the world ICT has become a crucial instrument for communication entertainment commerce and research and this increased usage is presenting new environmental and sustainability issues as we try and meet the ever growing needs of both businesses and individuals Sustainability must become central to the design of new technologies to make a concerted effort to tackle the environmental concerns we face now and for the future Development frameworks tools and models are used and explored and the New Participative Methodology for Sustainable Design NPMSD is introduced as a way of identifying key factors needed in developing more sustainable systems including new smart technology and portable devices It is hoped additional research will be carried out in the future to assess these sustainable design steps using larger more diverse countries with developed and developing economies to further refine such methods Sustainable Design will be an invaluable resource for students and researchers designers and business managers who are interested in the human centred environmental concerns of sustainable technologies *Russel Botman* Albert Grundlingh,Ruda Landman,Nico Koopman,2017-10-01 This celebratory volume tells the story of the late Russel Hayman Botman who died suddenly early in his second term as Rector and Vice Chancellor of Stellenbosch University Botman s story is told from his earliest childhood years until his last day as rector The nature of tributes and celebratory volumes is that it can never be exhaustive It tells a rich story from limited perspectives It

Wendt, 2021-05-07 Today it has become strikingly obvious that companies no longer operate in an environment where only risk return and volatility describe the business environment The business has to deal with volatility plus uncertainty plus complexity and ambiguity VUCA that requires new qualities competencies frameworks and it demands a new mind set to deal with the VUCA environment in investment funding and financing This book builds on a new megatrend beyond resilience called anti fragility We have had the black swan financial crisis and the red swan COVID the Bank for International Settlement is preparing for regenerative capitalism block chain based analysis of financial streams and is aiming to prevent the Green Swan the climate crisis to lead to the next lockdown In the light of the UN 17 Sustainable Development Goals what is required is Theories of Change Written by experts working in the fields of sustainable finance impact investing development finance carbon divesting innovation scaling finance impact entrepreneurship social stock exchanges alternative currencies Initial Coin Offerings ICOs ledger technologies civil action co creation impact management deep learning and transformation leadership the book begins by analysing existing Theories of Change frameworks from various disciplines and creating a new integrated model the meta framework In turn it presents insights on creating and using Theories of Change to redirect investment capital to sustainable companies while implementing the Sustainable Development Goals and the Paris Climate Agreement Further it discusses the perspective of planetary boundaries as defined by the Stockholm Resilience Institute and investigates various aspects of systems organizations entrepreneurship investment and finance that are closely tied to the mission ingrained in the Theory of Change As it demonstrates solutions that ensure the parity of profit people and

planet through dynamic change can effectively address the needs of entrepreneurs and business By exploring these concepts and their application the book helps create and shape new markets and opportunities *Streaming and Copyright Law* Lasantha Ariyaratna, 2022-09-05 This book examines the challenges posed to Australian copyright law by streaming from the end user perspective It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content's infringing nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions Modern Slavery and Human Trafficking Jane Reeves, 2021-01-20 This edited volume *Modern Slavery and Human Trafficking* is a collection of reviewed and relevant research chapters offering a comprehensive overview of recent developments in the field of modern slavery and human trafficking The book comprises single chapters authored by various researchers and edited by an expert active in the aforementioned research area Each chapter is complete in itself but united under a common research study topic This publication aims at providing a thorough overview of the latest research efforts by international authors on modern slavery and human trafficking and opening new possible research paths for further novel developments *Everyday Communists in South Africa's Liberation Struggle* Alan Kirkaldy, 2021-11-10 This

book explores the role of social movements in the Southern African liberation struggle through the lens of two everyday communists Focusing on the Communist Party of South Africa CPSA the author explores the lives of Ivan and Lesley Schermbrucker whose contribution to the party was more clandestine than that of leaders such as Bram Fischer and Joe Slovo They represent how ordinary people could play significant roles based on stances more rooted in common decency and morality than in Marxist theory The book also sheds light on the interplay between transnational and national tendencies during the liberation movement particularly between the 1940s and the 1960s The Schermbruckers changed their views in response to the shifting national and international political landscape the rise of Stalinism and the flight of South African activists into exile from the 1960s Both fluent in African languages they were able to create relationships of trust with African members of the CPSA Examining tensions and conflicts during the liberation struggle this book provides fresh insights into underground activism
