Teaching or Learning Fractions Lisa Hernandez, M.S. Ed., 2015-02-21 Welcome to The Amazing 8 Day Super Simple Scripted Guide to Teaching or Learning Fractions I have attempted to do just what the title says make learning fractions super simple I have also attempted to make it fun and even ear catching The reason for this is not that I am a frustrated stand up comic but because in my fourteen years of teaching the subject I have come to realize that my jokes even the bad ones have a crazy way of sticking in my students heads And should I use a joke even a bad one repetitively the associations become embedded in their brains many times to their chagrin What is so different about this book First of all it is scripted so

that tutors parents and teachers alike can deliver the lessons easily and without frustration Secondly the scripts and lessons have been carefully crafted to be ageless that is to apply to any learner based on age or level of mathematical mastery Finally the lessons have been carefully culled and edited over a decade in order to include the most necessary information in a finite and reasonable timetable something in this educator's opinion other books seem to lack [You Can Do Math](#) Sunil

Math Mammoth Introduction to Fractions Maria Miller, 2024-04-02 Math Mammoth Introduction to Fractions contains lessons for fraction arithmetic for grades 1-4 This material does not include division or multiplication of fractions nor adding unlike fractions which are topics for 5th and 6th grades Also most of the material here is for 3rd and 4th grades and only a few lessons are meant for grades 1-2 The topics covered are on a simple level constantly illustrated with visual models and with small denominators The presentation avoids spelling out specific rules for manipulating fractions but instead relies on the usage of pictures on a very concrete level Children easily confuse the various rules for fraction arithmetic because there are so many There is a place for the rules as shortcuts for ideas that are already understood but we do not start with them The goal is to let the big ideas sink in conceptually first followed by some shortcuts The topics covered are one half and one fourth concept of a fraction concept of a mixed number comparing fractions equivalent fractions adding and subtracting like fractions adding and subtracting mixed numbers with like fractional parts adding one fraction that has tenths and another that has hundredths such as $3\frac{10}{100}$ multiplying a fraction by a whole number The lessons are organized by topic not by increasing difficulty For reference 1st grade students

study only the concept of one half and one fourth In 2nd grade they study the concept of a fraction and optionally the easiest first lesson on comparing fractions In 3rd grade students study the concept of a fraction fractions on a number line comparing fractions and equivalent fractions Then in 4th they study mixed numbers comparing fractions equivalent fractions adding and subtracting fractions and mixed numbers and multiplying fractions by whole numbers The answers are appended
