The Sustainable Economics of Elinor Ostrom Derek

Wall,2014-02-24 Elinor Ostrom s Nobel Prize winning work on common pool property rights has implications for some of the most pressing sustainability issues of the twenty first century from tackling climate change to maintaining cyberspace In this book Derek Wall critically examines Ostrom s work while also exploring the following questions is it possible to combine insights rooted in methodological individualism with a theory that stresses collectivist solutions Is Ostrom s emphasis on largely local solutions to climate change relevant to a crisis propelled by global factors This volume situates her ideas in terms of the constitutional analysis of her partner Vincent Ostrom and wider institutional economics It outlines her key concerns including a radical research methodology commitment to indigenous people and the concept of social ecological systems Ostrom is recognised for producing a body of work which demonstrates how people can construct rules that allow them to exploit the environment in an ecologically sustainable way without the need for governmental regulation and this book argues that in a world where ecological realities increasingly threaten material prosperity such scholarship provides a way of thinking about how humanity can create truly sustainable development Given the inter disciplinary nature of Ostrom s work this book will be relevant to those working in the areas of environmental economics political economy political science and ecology

The Political Economy of City Branding Ari-Veikko Anttiroiko,2014-02-24 Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding

An Unworthy Future Joseph Toomey,2014-07-22 It is difficult to find an area of public policy more plagued by misunderstanding than energy policy Even worse every time the subject is raised we are obligated to get mired in pointless arguments about the weather This book helps set the record straight Not convinced Consider some of these inconvenient truths The cost of green energy climate remediation is anywhere from 10 to 1 000 times greater than the damage from the climate change it attempts to alleviate Germany the worlds leader in solar energy will spend more than 280 billion by 2030 on solar subsidies But all of that investment will only forestall 22nd century global

warming by 37 hours Obamas carbon tax would cost Americans 1 2 trillion over just ten years But it would only reduce the midrange 3 degree modeled 22nd century global temperature increase by 0 038 degrees Celsius At their current emissions growth rate it will take China nine months to replace the entire U S emissions cut that Obama wants to achieve over seven years at a staggering cost in American jobs and lost economic growth The U S biofuel program imposes a cost on consumers 9 862 times greater than any climate benefit they or their distant progeny will ever derive This is not another skeptical global warming polemic but an economic evaluation of how and why green energy will fail The world has too many pressing needs For the money Obama squandered on just a single bankrupt crony solar company the U S could have prevented 300 000 childhood malaria deaths in poor countries A thoroughly researched heavily documented book by an expert in his field it will demonstrate in meticulous detail how wasteful and economically inefficient Obamas green energy dead end future will be compared to other worthy alternatives Its time to end the hysterical climate cynicism and get on humanitys side

China's Economy Arthur R. Kroeber, 2016-03-01 China s Economy What Everyone Needs to Know is a concise introduction to the most astonishing economic growth story of the last three decades In the 1980s China was an impoverished backwater struggling to escape the political turmoil and economic mismanagement of the Mao era Today it is the world s second biggest economy the largest manufacturing and trading nation the consumer of half the world s steel and coal the biggest source of international tourists and one of the most influential investors in developing countries from southeast Asia to Africa to Latin America China s growth has lifted 700 million people out of poverty It has also created a monumental environmental mess with smog blanketed cities and carbon emissions that are a leading cause of climate change Multinational companies make billions of dollars in profits in China each year but traders around the world shudder at every gyration of the country s unruly stock markets Most surprising of all its capitalist economy is governed by an authoritarian Communist Party that shows no sign of loosening its grip How did China grow so fast for so long Can it keep growing and still solve its problems of environmental damage fast rising debt and rampant corruption How long can its vibrant economy co exist with the repressive one party state What do China s changes mean for the rest of the world China s Economy What Everyone Needs to Know answers these questions in straightforward language that you don t need to be an economist to understand but with a wealth of detail drawn from academic research interviews with dozens of company executives and policy makers and a quarter century of personal experience Whether you re doing business in China negotiating with its government officials or a student trying to navigate the complexities of this fascinating and diverse country this is the one book that will tell you everything you need to know about how China works where it came from and where it s going

and includes many charts and graphs in full color **Crisis and Class War in Egypt** Sean F. McMahon, 2016-10-15 In 2011 capital's crisis erupted in Egyptian society. This eruption and subsequent politics have been misrepresented as revolutionary as the working class was and is increasingly so devalued and disempowered. In *Crisis and Class War in Egypt* Sean F. McMahon critically analyses Egypt's recent political history. He argues that the so-called revolution was the appearance of capital's destruction of the value of the Egyptian working class and an existential crisis for capital. In response, productive capital in the form of the military used, disposed of, and replaced its junior partners in governing: first the predatory capital of the Mubarak state with the commodity capital of the Muslim Brotherhood and then commodity capital with the finance capital of the Gulf Cooperation Council. These reconfigurations have been expressed in all manner of reactionary governmental arrangements including constitutions, legislation, and currency reform. Extending today's analysis into the near future, McMahon sees the war of Egyptian society intensifying and increasingly violent lives for Egyptian workers. *The Politics of Education in Developing Countries* Sam Hickey, Naomi Hossain, 2019-02-21 Why have many developing countries that have succeeded in expanding access to education made such limited progress on improving learning outcomes? There is a growing recognition that the learning crisis constitutes a significant dimension of global inequality and also that educational outcomes in developing countries are shaped by political as well as socio-economic and other factors. *The Politics of Education in Developing Countries* focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries: Bangladesh, Cambodia, Ghana, Rwanda, South Africa, and Uganda. The problem of education quality is serious across the Global South. *The Politics of Education in Developing Countries: From Schooling to Learning* deploys a new conceptual framework, the domains of power approach, to show how the type of political settlement shapes the level of elite commitment and state capacity to improving learning outcomes. The domain of education is prone to being highly politicized as it offers an important source of both rents and legitimacy to political elites and can be central to paradigmatic elite ideas around nation building and modernity. Of particular importance is the relative strength of coalitions pushing for access as against those focused on issues of higher quality education. This book concludes with a discussion of entry points and strategies for thinking and working politically in relation to education quality reforms and critical commentaries. **Failure to Adjust** Edward Alden, 2017-09-15 Americans know that something has gone wrong in this country's effort to prosper in the face of growing global economic competition. The vast benefits promised by the supporters of globalization and by their own government have never materialized for most Americans. This book is the story of what went wrong and how to correct the course. It is a compelling history of the last four decades of US economic and trade policies that have left Americans unable to adapt to or compete in the current global marketplace. *Failure to Adjust* argues that despite the deep partisan divisions over how best to respond to America's competitive challenges, there is achievable common ground on such issues as fostering innovation, overhauling tax rules to encourage investment in the United States, boosting graduation

rates investing in infrastructure and streamlining regulations The federal government needs to become more like U S state governments in embracing economic competitiveness as a central function of government The book presents an especially timely analysis of the trade policies of the Obama administration and discusses how America can reassert itself as the leader in setting rules for international economic competition that would spread the benefits of global trade and investment more broadly

The Consolations of Economics Gerard Lyons, 2014-06-17 In the next twenty years the world economy will enjoy one of its strongest periods of growth Greater innovation and technical change will increase opportunities Life expectancy income and educational standards will rise The West s share in the global economic cake may get smaller but there will be more cake than ever before These are the predictions of Gerard Lyons a leading international economist who spent nearly thirty years working in the City He is now the chief economic adviser to the Mayor of London Over the last quarter century he has been ahead of the game in predicting the major economic trends that we now take as a given The Consolations of Economics is a lucid and accessible expert s attempt to look objectively at the changing global economy what is happening and what it means He shows how we can embrace change rather than hide from it The results are fascinating refreshing and unusually cheering

Inequality, Class, and Economics Eric Schutz, 2022-01-24 The COVID 19 pandemic exposed the economic inequalities pervading every aspect of society and then multiplied them to a staggering degree In Inequality Class and Economics Eric Schutz illuminates the pillars undergirding the monstrous polarities which define our times revealing them as the structures of power that constitute the foundations of the class system of today s capitalism Employers power is the linchpin of that system but the power of professionals in all fields the power exerted by some businesses over others political power and the power of cultural institutions especially mass media and education are also critical for the class system today Each of these social power structures is examined closely and shown both to sustain and to be sustained by economic inequality Employing both traditional and novel approaches to public policy Inequality Class and Economics denounces economists studied avoidance of the problem of class as a system of inequality based in unequal opportunity and exhorts us to tackle the heart of the problem at long last Back cover

The Limits to Capital in Spain G. Charnock, T. Purcell, R. Ribera-Fumaz, 2014-02-18 Spain is at the epicentre of a crisis that threatens the future of the Eurozone This book explains the deep historical and structural roots of the current crisis in Spain It analyses the nexus between European circuits of financial capital urbanisation and the emergent dynamics of state austerity and popular revolt

Production Politics and Migrant Labour Regimes Charanpal Singh Bal, 2016-09-23 This book emphasizes the importance of production politics or struggles in the workplace between workers and their employers for understanding migrant labour regimes in Asia and the Gulf Drawing from a study of Bangladeshi construction workers in Singapore as well as on comparative material in the region Bal shows that migrant labour politics are significantly influenced by the specific form of production politics as well as their variable outcomes In contrast to contentious politics approaches this book sheds light on

the extent to which migrant labour regimes can be contested by workers and civil society groups and explains the recent rise in migrant labour unrest in the region
