Nature Week Activities:

One Health: The Well-being Impacts of Human-nature Relationships Eric Brymer, Elizabeth Louise Freeman, Miles Richardson, 2019-11-07 In recent years there has been a growing body of evidence from fields such as public health architecture ecology landscape forestry psychology sport science psychiatry geography suggesting that nature enhances psychological health and wellbeing Physical activity in the presence of nature feelings of connection to nature engagement with nature specific environmental features e g therapeutic water and trees and images of real and virtual nature have all been posited as important wellbeing facilitators Thus the association between natural environments and health outcomes might be more complex than initially understood Pritchard Richardson Sheffield Karmanov Freeman Akhurst 2015 in the development of wellbeing and health outcomes Furthermore traditional theoretical notions such as Biophilia topophilia restoration theories and stress reduction theories typically used to interpret findings are also being critiqued Often one of the main barriers for practitioners is the vast array of theories that claim to effectively explain research findings but that tend to be only partially relevant e g for Physical activity or restoration focus on the characteristics of the person e g nature relatedness and only some features of the landscape e g therapeutic landscapes This special edition therefore brings together cutting edge ideas and research from a wide set of disciplines with the purpose of exploring interdisciplinary or trans disciplinary approaches to understanding the psychological health and wellbeing benefits of human nature interactions

sense book empowers you to improve your health relationships and happiness by replacing destructive omissions in how we learn to think with rejuvenated natural sensitivities Learn how to reconnect your psyche to its nurturing origins in the restorative vigor sustainability and peace of nature Help yourself and your community benefit from the profound renewal that lies in the magnificence of a beautiful day the wisdom of an ancient tree and the fortitude of a weed Let nature s invincible healing energies help your thinking transform your stress disorders and harmful bonds into constructive personal social and environmental rewards Grow from hands on accredited Applied Biophilia classes essays activities research internships ethics counseling and healing Strengthen your inborn natural genius Enjoy an Earth friendly job career internship or teaching certification Take advantage of subsidized online courses and degree programs To understand how and why this book will work for you as it has for so many others consider the following key intelligence test question one that ordinarily might help assess a person s mathematical aptitude If you count a dog s tail as one of its legs how many legs does a dog have Five of course is the correct answer for a math test Intelligent people say five because it is valid in mathematical systems and contemporary thinking and is highly regarded and rewarded by our society However we don t solely live our lives or think in mathematical systems Our natural sense of reason can consider what we know from our actual contact with a real normal dog too That s when our multitude of other natural senses come into play senses of touch motion color texture language sound smell consciousness community trust contrast and love They each provide further information and help our sense of reason make more sense and a more informed decision They enable our thinking to register that a tail is different than a leg that a dog has four legs not five no matter what might be correct in mathematical logic It is a grave mistake for anyone not to take seriously the difference between 4 leg and 5 leg ways of knowing and our learned prejudice for the latter As this book shows when they are not in balance the schism between their two different ways of registering the world is significant Four leg knowing is a magnificent psychological and physiological phenomenon with deep natural system roots into the eons the heart of Earth and our psyche It brings our widely diverse multiplicity of natural sensory experiences into our awareness Five leg knowing produces important awareness through abstract imagination labels and stories However when it does not also seek and contain 4 leg knowledge it results not only in our desensitization but in the separation of our thinking from the regenerative powers of Earth s natural systems within and around us This profound loss produces the many destructive side effects of our artificial world that we can not readily solve Four leg versus 5 leg discord creates an entrenched conflict in our psyche between how we think and how nature works This is a point source of the stress and contamination our society produces in the integrity of people and the environment It generates our many disorders and troubles that are seldom found in nature It is important to recognize is that by financially and socially rewarding us for getting good grades or for making the grade by using nature isolated 5 leg thinking our socialization habitually bonds conditions programs or ad
