Hidden Knowledge Ayub V. O. Ofulla, 2013-08-01 In *The Secrets of Hidden Knowledge* author Prof Ayub V O Ofulla presents the basic physics of life as it relates to molecular physical realities of life itself or social life as it relates to the individual. Grounded on physical biological and social sciences intertwined with information from ancient writings and scriptures *The Secrets of Hidden Knowledge* provides the foundation to help you maintain order in your life avoid or tackle situations that are chaotic and act as stumbling blocks and embrace unavoidable chaotic situations and use them for innovative survival and faster progress. You can also come to understand how the basic nature of the physical universe is part and parcel of your life and realize the part of nature your life occupies and how it shapes you and your progress or failure in the world. You can successfully exist and change your attitude to live a peaceful harmonious and progressive life. Provocative and informative *The Secrets of Hidden Knowledge* shows that ever prevalent chaos brings failure. Thus it is imperative to create a balance to only allow a bit of chaos to help us embrace change conduct research and innovate to help us progress and live more harmonious lives. This book demonstrates how we can learn from Mother Nature whose creative genius consists in nothing but perpetual ordering of chaos. The book will both inform and inspire. R. Kets de Vries,2014-06-17 Everything about hunting leads inexorably to death the challenge for all hunters is how to justify the kill But the hunters emotional response to the kill is immensely complex Hunters respect and even love the animals they kill *Talking to the Shaman Within* Musings on Hunting addresses this paradox head on dissecting the emotional and psychological response of the hunter to his quarry and more broadly his surroundings The climax of the chase brings the hunter closer to realizing the nature intelligence that modern civilization has suppressed Through his investigation of the instinct that lies beneath the urge to hunt author Manfred F R

Kets de Vries reveals something basic and fundamental about human behavior. The hunting instinct is hardwired into the human psyche and for all our sophistication and urbanization it exerts a powerful influence over the way we conduct our lives even to this day. *Talking to the Shaman* Within draws on depictions of hunting in art and literature throughout the ages exploring changing trends in human social norms with frequent reference to literature, art, film, television and music. It unites a dispassionate academic hypothesis with an engaging and colourful narrative into which Kets de Vries weaves stories from his own life as both an academic and a hunter. **Quill & Quire**, 2010. *Things* Carolyn Korsmeyer, 2019. *Things In Touch with the Past* explores the value of artifacts that have survived from the past and that can be said to embody their histories. Such genuine or real things afford a particular kind of aesthetic experience, an encounter with the past despite the fact that genuineness is not a perceptually detectable property. Although it often goes unnoticed, the sense of touch underlies such encounters even though one is often not permitted literal touch. Carolyn Korsmeyer begins her account with the claim that wonder or marvel at old things fits within an experiential account of the aesthetic. She then presents her main argument regarding the role of touch both when literal contact is made and when proximity suffices for touch is a fundamental sense that registers bodily position and location. Correct understanding of the identity of objects is presumed when one values things just because of what they are and with discovery that a mistake has been made, admiration is often withdrawn. Far from undermining the importance of the genuine, these errors of identification confirm it. Korsmeyer elaborates this position with a comparison between valuing artifacts and valuing persons. She also considers the ethical issues of genuineness for artifacts can be harmed in various ways ranging from vandalism to botched restoration. She examines the differences between a real thing and a replica in detail, making it clear that genuineness comes in degrees. Her final chapter reviews the ontology that best suits an account of persistence over time of things that are valued for being the real thing.

Shakespeare and Ecology Randall Martin, 2015. *Shakespeare and Ecology* is the first book to explore the topical contexts that shaped the environmental knowledge and politics of Shakespeare and his audiences. Early modern England experienced unprecedented environmental challenges including climate change, population growth, resource shortfalls and habitat destruction which anticipate today's globally magnified crises. Shakespeare wove these events into the poetic textures and embodied action of his drama, contributing to the formation of a public ecological consciousness while opening creative pathways for reimagining future human relationships with the natural world and non-human life. This book begins with an overview of ecological modernity across Shakespeare's work before focusing on three major environmental controversies in particular plays: deforestation in *The Merry Wives of Windsor* and *The Tempest*; profit-driven agriculture in *As You Like It*; and gunpowder warfare and remedial cultivation in *Henry IV Parts One and Two*, *Henry V* and *Macbeth*. A fourth chapter examines the interdependency of local and global eco-relations in *Cymbeline* and the final chapter explores Darwinian micro-ecologies in *Hamlet* and *Antony and Cleopatra*. An epilogue suggests that Shakespeare's greatest potential for mobilizing

modern ecological ideas and practices lies in contemporary performance Shakespeare and Ecology illuminates the historical antecedents of modern ecological knowledge and activism and explores Shakespeare's capacity for generating imaginative and performative responses to today's environmental challenges **On Hunting** Lt. Col. Dave Grossman, Linda K. Miller, Capt. Keith A. Cunningham, 2023-03-07 Hunting is our heritage our heart and our future Where does hunting fit in the modern world To many it can seem outdated or even cruel but as On Hunting affirms hunting is holistic honest and continually relevant Authors Grossman Miller and Cunningham dive deep into the ancient past of hunting and examine its position today demonstrating that we cannot understand humanity without first understanding hunting Readers will discover how hunting formed us examine hunting ethics and their adaptation to modernity understand the challenges traditions and reverence of today's hunter identify hunting skills and their many applications outside the field learn why hunting is critical to ecological restoration and preservation and gain inspiration to share hunting with others Drawing from ecology philosophy and anthropology and sprinkled with campfire stories this wide ranging examination has rich depths for both nonhunters and hunters alike On Hunting shows that we need hunting still and so does the wild earth we inhabit Beasts Jeffrey Moussaieff Masson, 2014-03-13 Orcas or killer whales are one of the planet's supreme predators Alongside humans they have the most complex brains to be found in nature But while one of these two species has killed 200 million members of its own kind in the twentieth century alone the other has killed none This is where Jeffrey Masson's fascinating new book begins there is something different about humans Masson has shown us that animals can teach us much about our own emotions about love dogs contentment cats and grief elephants But they have much to teach us about the negative emotions such as anger and aggression as well and in unexpected ways In Beasts he demonstrates that the violence we perceive in the wild is mostly a matter of projection We link the basest human behaviour to animals to beasts and claim the high ground for our species We are least human we think when we succumb to our primitive animal instincts In fact nothing could be further from the truth Animal predators kill to survive but there is nothing in the annals of animal aggression remotely equivalent to the violence mankind has inflicted upon itself Humans and humans in our modern industrialised world in particular are the most violent species in existence We lack what all other animals have a check on aggression that serves the species rather than destroys it And it is here that animals have something vitally important to teach us about ourselves
