Seeing is a cultural and intellectual history of people with mental illnesses in the twentieth century United States While
acknowledging the fraught and often violent histories of American psychiatric hospitals Heather Murray also suggests that it
is in these hospitals that patients became more intense observers they gave more conscious consideration to institutional and
broader kinds of citizenship to the nature and needs of communities versus those of individuals to scientific modernity and to
human rights and solidarities among the suffering All of these ideas have animated twentieth century America and as Murray
shows have not just flowed into psychiatric hospitals but outward from them as well These themes are especially clear within
patients intimate creative and political correspondence writings and drawings as well as in hospital publications and films
This way of thinking and imagining contrasts with more common images of the patient as passive resigned and absented
from the world in the cloistered setting of the hospital that have animated psychiatry over the course of the twentieth century
Asylum Ways of Seeing traces how it is that patient resignation went from being interpreted as wisdom in the early twentieth
century to being understood as a capitulation in scientific and political sources by mid century to being seen as a profound
violation of selfhood and individual rights by the century s end In so doing it makes a call to reconsider the philosophical
possibilities within resignation *The NIH Record* ,1999 Brief Interventions for Adolescent Alcohol and Substance
