Animals in the Fiction of Cormac McCarthy Wallis R. Sanborn, III, 2006-03-27 The works of Cormac McCarthy have been critically studied as literature of the South and of the Border Southwest Largely ignored is the omnipresence and presentation of animals in McCarthy's works Yet the abundant representations of animals depict a part of the ceaseless battle for survival that is inherent in many of his writings McCarthy's animals exist within the framework of a fictional natural world driven by biological determinism Wild animals prey upon feral and domestic animals horses exist as warriors and the hunt is a ballet between man and hunting hound Proximity to humans results in mistreatment and death while distance results in survival and fitness McCarthy also utilizes animals as harbingers of specific events for example hogs are so frequently a precursor of human death that McCarthy's narrators and characters wonder whether hogs are joined to the devil for evil purposes The first chapter here examines animal presentations in *The Stonemason* *The Gardener's Son* and two short stories *Bounty* and *The Dark Waters* The following nine chapters focus on one text one type of animal feline swine bovine bird and bat canine equine lupine and hound and one particular thesis Each chapter also briefly examines the specific animal as it exists in other McCarthy works

The Pastoral Vision of Cormac McCarthy Georg Guillemin, 2004-06-17 Georg Guillemin's visionary approach to the work of Western novelist Cormac McCarthy combines an overall survey of McCarthy's eight novels in print with a comprehensive analysis of the author's evolving ecopastoralism Using in depth textual interpretations Guillemin argues that even McCarthy's early work is characterized less by traditional nostalgia for a lost pastoral order than by a radically egalitarian land ethic that prefigures today's ecopastoral tendencies in Western American writing The study shows that more than any of the other landscapes evoked by McCarthy the Southwestern desert becomes the stage for his dramatizations of a wild sense of the pastoral McCarthy's fourth novel *Suttree* which is the only one set inside an urban environment is used in the introductory chapter to discuss the relevant compositional aspects of his fiction and the methodology of the chapters to come The main part of the study devotes chapters to McCarthy's Southern novels his keystone work *Blood Meridian* and the Western novels known as the Border Trilogy The concluding chapter discusses the broader context of American pastoralism and suggests that McCarthy's ecopastoralism is animistic rather than environmentalist in character Guillemin shows that the very popular Border Trilogy takes McCarthy's ecopastoralism to its

culmination although this is often overlooked precisely because of the simplicity of the plots picaresque quests As the trilogy arranges its plots as a search for a life of pastoral harmony All the Pretty Horses envisions a nomadic version of pastoral The Crossing and experiences the foreclosure of the pastoral vision anywhere Cities of the Plain the trilogy as a whole tacitly acknowledges the obsolescence of utopian pastoralism Increasingly man ceases to be the dominant focus of narration so that the shift from an egocentric to an ecocentric sense of self marks both the heroes and narrators of McCarthy's novels

Cormac McCarthy and the Writing of American Spaces Andrew Keller Estes, 2013. In *Cormac McCarthy and the Writing of American Spaces*, Andrew Estes examines ideas about the land as they emerge in the later fiction of this important contemporary author. McCarthy's texts are shown to be part of larger narratives about American environments. Against the backdrop of the emerging discipline of environmental criticism, Estes investigates the way space has been constructed in U.S. American writing. Cormac McCarthy is found to be heir to diametrically opposed concepts of space as something Americans embraced as either overwhelmingly positive and reinvigorating or as rather negative and threatening. McCarthy's texts both replicate this binary thinking about American environments and challenge readers to reconceive traditional ways of seeing space. Breaking new ground as to how literary landscapes and spaces are critically assessed, this study seeks to examine the many detailed descriptions of the physical world in McCarthy on their own terms. Adding to so-called second-wave environmental criticism, it reaches beyond an earlier limited understanding of the environment as nature to consider both natural landscapes and built environments. Chapter one discusses the field of environmental criticism in reference to McCarthy, while chapter two offers a brief narrative of conceptions of space in the U.S. Chapter three highlights trends in McCarthy criticism. Chapters four through eight provide close readings of McCarthy's later novels, from *Blood Meridian* to *The Road*.
