volcanic eruption threatening the mountain towns of North Carolina and the strange movements of fast moving bodies traveling at very high speeds but he is warned by a hand lettered note to give up his investigation *Master of the World* ,2015 Jules Gabriel Verne was born on February 8th 1828 on le Feydeau a small artificial island on the Loire River in Nantes His father wanted his son to take over the family law practice Jules started along this course and despite graduating with a licence en droit in January 1851 was soon diverted by the lure of literature and by his own ambitious talents in this direction He wrote for the theatre and for magazines and soon with the publication of his first novel Five Weeks in a Balloon on January 31st 1863 he had begun his career as an admired and popular author For many many years the works flowed usually no less than and often more than two volumes per year His meticulous research and imaginative setting and narratives soon established him as a top selling author and he became both famous and wealthy By publishing firstly as a serialised book and then as a complete book sales swelled as did his reputation His earnings increased further due to the runaway success from the stage adaptations of Le tour du monde en quatre vingts jours 1874 and Michel Strogoff 1876 Strangely he was overlooked for honours He was not even nominated for membership of the Acad mie Fran aise After the death of both his mother and Hetzel Jules began to publish darker works but still at a prodigious rate In 1888 Jules entered politics and was elected town councillor of Amiens and then served for fifteen years Jules was now entering the last period of his life His works continued to flow albeit at a slower pace His reconciled with his son Michel who now became an active contributor to his father s works and when the senior Verne died would continue to contribute and publish his father s works ensuring that the work was kept in the public eye and the legacy preserved On March 24th 1905 while ill with diabetes Jules Verne died at his home at 44 Boulevard Longueville Amiens As a legacy Jules Verne is forever remembered as The Father of Science Fiction With his rigorous research Jules was not only able to make his works realistic but also to project forward and predict many new things that would eventually come to pass either in real life or as the basis for others to use in their own science fiction Extraordinary indeed **The Master of the World** Jules Verne,2015-11-03 Jules Gabriel Verne 8 February 1828 24 March 1905 was a French novelist poet and playwright best known for his adventure novels and his profound influence on the literary genre of science fiction Verne was born to bourgeois parents in the seaport of Nantes where he was trained to follow in his father s footsteps as a lawyer but quit the profession early in life to write for magazines and the stage His collaboration with the publisher Pierre Jules Hetzel led to the creation of the Voyages Extraordinaires a widely popular series of scrupulously researched adventure novels including Journey to the Center of the Earth Twenty Thousand Leagues Under the Sea and Around the World in Eighty Days Verne is generally considered a major literary author in France and most of Europe where he has had a wide influence on the literary avant garde and on surrealism His reputation is markedly different in Anglophone regions where he has often been labeled a writer of genre fiction or children s books largely because of the highly abridged and altered translations in which his novels are often reprinted Verne is the second most translated author in

the world since 1979 ranking between the English language writers Agatha Christie and William Shakespeare he probably was the most translated during the 1960s and 1970s In English he is one so called father of science fiction a title also given to H G Wells and Hugo Gernsback Jules Verne appeared in Transformers Rescue Bots series in the episode Last of Morocco where he is revealed to be the estranged friend of recurring series antagonist Thaddeus Morocco He is also a time traveler having discovered a means of moving through the ages using a device of his own invention and Energon the power source of all Transformers After being contacted by his old friend Jules Verne travels to the present day and meets the Rescue Bots and reveals that he has encountered other Transformers during his travels through time At the time that he meets the series heroes he has not yet written 20 000 Leagues Under the Sea but later becomes determined to do so after taking a trip in a submarine In a paradox Morocco has a submarine called the Nemo that he presumably named for Jules Verne s character whom Verne presumably named after the adventure involving the submarine As a result of the episode s events Verne takes Morocco whose memories have been erased so that he no longer remembers his villainous career to the future to live
