Walking Shadows Ib Johansen, 2015-08-25 *Walking Shadows* focuses on the American fantastic and the American grotesque attempting in this manner for the first time to establish an overview of and a theoretical approach to two literary modes that have often been regarded as essential to an understanding of the American cultural canon The central importance of these two literary forms has been pointed out earlier by important theorists such as Stanley Cavell David Reynolds and William Van O Connor A number of literary works from the beginning of the nineteenth to the end of the twentieth centuries are taken up in order to illustrate the inherent links or family resemblances between the two modes with special reference to the way in which a Bakhtinian reading may facilitate our appreciation of their status within the canon These excursions into the House of Fantastic and Grotesque Fiction may be of interest not only to hardcore aficionados but also to philosophically minded readers in general in particular perhaps to those who have paid acute attention to debates on late twentieth and early twenty first century post structuralism and deconstruction where the classic positions of Foucault Derrida et al still appear to be relevant

We Do Know How James T. Riordan,2014-09-24 An insider with practical experience in development work reveals how understanding market realities can more effectively reduce poverty This book by a practitioner not an academic government official or pundit has been written for practitioners and offers fresh thinking on how to do international development work It combines that thinking with practical guidance in plain English on what to do and perhaps just as importantly what not to do on the ground We Do Know How takes buzzwords commonly used in development circles demand driven results oriented accountability and others and makes them real spelling out a proven approach for expanding business sales and generating jobs for poor people Although government has a role to play in development in the end the actions of businesses drive economic growth and expand people s incomes We Do

Know How shows how to build on the incentives that drive businesses and in the process create jobs for the poor Specifically it urges development practitioners to support only those business opportunities for which there is market demand abiding by the maxim produce what you can sell not sell what you produce More than that it cautions practitioners not to become solutions looking for problems but to search creatively for ways to solve the specific problems that stand most in the way of clients meeting buyers requirements We Do Know How challenges much conventional wisdom on how to do development work At the same time and in contrast to other books on development it shows how by maintaining focus and discipline development practitioners can deliver demonstrable increases in jobs for those who need them **The Technologists**
