The auditing profession was born as double check accountants do to what came in and out the door. The reports accountants took were given orally, hence the name "auditing".

Double entry records first came out in Genoa.

• The account was important, it was one of the first documents known for printing in Venice for the first time.

• The first use of accounting was about double entry in one of the most important medieval treatises on the bookkeeping system, the *Summa de Arithmetica* by Luca Pacioli, which was published in 1494.

• As the time progressed, double entry records had large and small innovations added. This also created the need for a change in financial accounting and managerial accounting.

• The first accounting organization was developed in New York in the year 1887.

• The role and professional license of the Certified Public Accountant followed shortly in the year 1900.
