*The Great River* Boyce Upholt, 2024-06-11 Instant Bestseller Winner of the 2024 Willie Morris Award for Southern Nonfiction A Chicago Public Library Must Read Book of 2024 A Booklist Editors Choice A sweeping history of the Mississippi River and the centuries of human meddling that have transformed both it and America The Mississippi River lies at the heart of America an undeniable life force that is intertwined with the nation's culture and history Its watershed spans almost half the country Mark Twain's travels on the river inspired our first national literature and jazz and blues were born in its floodplains and carried upstream In this landmark work of natural history Boyce Upholt tells the epic story of this wild and unruly river and the centuries of efforts to control it Over thousands of years the Mississippi watershed was home to millions of Indigenous people who regarded the great river with awe and respect adorning its banks with astonishing spiritual earthworks The river was ever changing and Indigenous tribes embraced and even depended on its regular flooding But the expanse of the watershed and the rich soils of its floodplain lured European settlers and American pioneers who had a different vision the river was a foe to conquer Centuries of human attempts to own contain and rework the Mississippi River from Thomas Jefferson's expansionist land hunger through today's era of environmental concern have now transformed its landscape Upholt reveals how an ambitious and sometimes contentious program of engineering government built levees jetties dikes and dams has not only damaged once vibrant ecosystems but may not work much longer Carrying readers along the river's last remaining backchannels he explores how scientists are now hoping to restore what has been lost Rich and powerful *The Great River* delivers a startling account of what happens when we try to fight against nature instead of acknowledging and embracing its power a lesson that is all too relevant in our rapidly changing world

**Looking out the Window** Bob Webster, 2022-01-25 The hot dry seasons of the past few years have caused rapid disintegration of glaciers in Glacier National Park Montana Sperry Glacier has lost one quarter or perhaps one third of its ice in the past 18 years If this rapid rate should continue the glacier would almost disappear in another 25 years Born about 4 000 years ago the glaciers that are the chief attraction in

Glacier National Park are shrinking so rapidly that a person who visited them ten or fifteen years ago would hardly recognize them today as the same ice masses. Do these reports sound familiar? Typical of frequent warnings of the dire consequences to be expected from global warming, such reports often claim modern civilization's use of fossil fuels as being the dominant cause of recent climate warming. You might be surprised to learn the reports above were made nearly thirty years apart. The first in 1923 prior to the record heat of the Dust Bowl years during the 1930s. The second in 1952 during the second decade of a four decade cooling trend that had some scientists concerned that a new ice age might be on the horizon. Did the remnants of Sperry Glacier disappear during global warming of the late 20th century? According to the US Geological Survey, USGS today Sperry Glacier ranks as a moderately sized glacier in Glacier National Park. What caused the warmer global climate prior to 4 000 years ago before Glacier National Park's glaciers first appeared? Are you aware that during 2019 the National Park Service quietly began removing its 'Gone by 2020' signs from Glacier National Park as its most famous glaciers continued their renewed growth that began in 2010? Was late 20th century global warming caused by fossil fuel emissions? Was it really more pronounced than early 20th century warming? Or was late 20th century warming perfectly natural in part a response to the concurrent peak strength of one of the strongest solar grand maxima in contemporary history? These and other questions are addressed by *Looking Out the Window: Be a juror in the trial of carbon dioxide in the court of public opinion and let the evidence inform your verdict*. **Water Resources Management**, 2006 **The Working Press of the Nation**, 2002. v 1 Newspaper directory v 2 Magazine directory v 3 TV and radio directory v 4 Feature writer and photographer directory v 5 Internal publications directory **Introduction to Homeland Security** David H.
