Teaching Innovation in Architecture and Building Engineering David Bienvenido-Huertas,María Luisa de la Hoz-Torres,Antonio Jesús Aguilar Aguilera,2024-06-19 This book presents contributions on teaching innovation in university architecture and building engineering studies The authors explain how the

construction sector demands that future architects and building engineers have the knowledge and skills that allow them to meet the decarbonization objectives established by international organizations and that this causes the level of knowledge to be higher. The contributors further discuss new technologies and the internationalization of studies presenting new challenges university studies must face. This heterogeneity is represented in the chapters that make up this book developed by researchers from different countries. The book is divided into three blocks: i Active learning methodologies ii Innovative methodologies applied to learning process and iii Traditional vs Advanced Techniques. The chapters of the book represent an advance in the current knowledge of teaching innovation techniques in university architecture and building engineering studies.

Design of Industrial Information Systems Thomas Boucher, Ali Yalcin, 2010-07-26. Design of Industrial Information Systems presents a body of knowledge applicable to many aspects of industrial and manufacturing systems. New software systems such as Enterprise Resource Planning and new hardware technologies such as RFID have made it possible to integrate what were separate IT databases and operations into one system to realize the greatest possible operational efficiencies. This text provides a background in and an introduction to the relevant information technologies and shows how they are used to model and implement integrated IT systems. With the growth of courses in information technology offered in industrial engineering and engineering management programs, the authors have written this book to show how such computer based knowledge systems are designed and used in modern manufacturing and industrial companies. Introduces Data Modeling and Functional Architecture Design with a focus on integration for overall system design. Encompasses hands on approach employing many in chapter exercises and end of chapter problem sets with case studies in manufacturing and service industries. Shows the reader how Information Systems can be integrated into a wider E business Web Enabled Database business model. Offers applications in Enterprise Resource Planning ERP and Manufacturing Execution Systems MES.
