Ballhatchet,2013-12-16 This is a study of the ways in which changing social expectations among Indian Catholics confronted the Roman Church with new questions as well as giving fresh urgency to the old problem of the persistence of caste among Christians Low caste restiveness prompted different reactions among European missionaries and high caste Indian priests and the socio economic significance of religious conversion became a problem that reached the level of the Apostolic Delegate and eventually of the Pope The English brought their social attitudes to India where they became racial attitudes while retaining their triple functions of supporting authority structures protecting vested interests and providing psychological reinforcement Roman Catholic missionaries came from different European countries and brought with them different national attitudes to social mores A major question asked in this book is how far such national differences were reflected in attitudes to caste class and sexual behaviour how similar were the attitudes of Indian Christians and how far the functions of such attitudes remained constant Annual Department of Defense Bibliography of Logistics Studies and Related Documents United States. desegregation case which gave rise to school busing This book recounts the last forty years of Charlotte s desegregation and resegregation putting education reform in political and economic context Within a decade of the Swann case the district had developed one of the nation s most successful desegregation plans measured by racial balance and improved academic outcomes for both black and white students However beginning in the 1990s this plan was gradually dismantled Today the level of resegregation in Charlotte has almost returned to what it was prior to 1971 At the core of Charlotte s story is the relationship between social structure and human agency with an emphasis on how yesterday s decisions and actions define today s choices
