Silver, 2022-12-20 As we enter the third decade of the twenty first century the world faces extraordinary system level challenges from deep inequality and xenophobic nationalism to militarism and neofascism from the refugee crisis and environmental degradation to upsurges of social unrest and escalating rivalries among powerful states This book begins from the premise that world systems analysis can be a powerful tool for the study of these problems with the potential to overcome the methodological and theoretical limitations of other social science perspectives The editors argue moreover that world systems analysis can be strengthened by drawing on its holistic methodologies returning to its Third World roots and learning from other critical approaches The authors in this volume not only make important contributions to comparative and historical social science they also bring a new vigor to the world systems perspective Facing critical junctures in both the state of knowledge and the state of the world this book demonstrates the continued utility of and future possibilities for world systems analysis Accumulation on a world scale ... vol. 1 S. Embodied Rhetorics James C. Wilson, Cynthia Lewiecki-Wilson, 2001 Presenting thirteen essays editors James C Wilson and Cynthia Lewiecki Wilson unite the fields of disability studies and rhetoric to examine connections between disability education language and cultural practices Bringing together theoretical and analytical perspectives from rhetorical studies and disability studies these essays extend both the field of rhetoric and the newer field of disability studies The contributors span a range of academic fields including English education history and sociology Several contributors are themselves disabled or have disabled family members While some essays included in this volume analyze the ways that representations of disability construct identity and attitudes toward the disabled other essays use disability as a critical modality to rethink economic theory educational practices and everyday interactions Among the disabilities discussed within these contexts are various physical disabilities mental illness learning disabilities deafness blindness and diseases such as multiple sclerosis and AIDS **The Ravages of Neo-liberalism** Nesecan Balkan, Sungur Savran, 2002 Ravages Of Neo Liberalism Economy Society Gender In Turkey **Theory is History** Samir Amin, 2013-12-12 This book focuses on a central concept that Theory is History as the theory of capitalism can only be formulated on the basis of an analysis of its history In contrast bourgeois

thinking replaces the analysis of historical capitalism with an abstract theory without any links to reality Economics which is the theory of an imaginary system then becomes an apologia intended to give legitimacy to the behaviour of the owners of capital The author pays special attention to the globalization of the law of value The individual chapters illustrate the author's thesis by focusing on the links between capital and land ownership between modernity and religious interpretation and on questions of the global expansion of capitalism particularly the ways it has evolved in certain countries in this case Russia and China This anthology supplements the author's previous work centred on the rise of the South his reading of capitalism focusing on its imperialist nature Imperialism and Global Political Economy Alex Callinicos, 2013-04-18 In *Imperialism and Global Political Economy* Alex Callinicos intervenes in one of the main political and intellectual debates of the day The global policies of the United States in the past decade have encouraged the widespread belief that we live in a new era of imperialism But is this belief true and what does imperialism mean Callinicos explores these questions in this wide ranging book In the first part he critically assesses the classical theories of imperialism developed in the era of the First World War by Marxists such as Lenin Luxemburg and Bukharin and by the Liberal economist J A Hobson He then outlines a theory of the relationship between capitalism as an economic system and the international state system carving out a distinctive position compared to other contemporary theorists of empire and imperialism such as Antonio Negri David Harvey Giovanni Arrighi and Ellen Wood In the second half of *Imperialism and Global Political Economy* Callinicos traces the history of capitalist imperialism from the Dutch East India Company to the specific patterns of economic and geopolitical competition in the contemporary era of American decline and Chinese expansion Imperialism he concludes is far from dead *Dissident Marxism* David Renton, 2008-02-29 We are witnessing the birth of a new politics anti capitalist libertarian and anti war But where do today's dissidents come from *Dissident Marxism* argues that their roots can be found in the life and work of an earlier generation of socialist revolutionaries including such inspiring figures as the Soviet poet Mayakovsky the Marxist philosopher Karl Korsch Communist historians Edward Thompson and Dona Torr the Egyptian surrealist Georges Henein American New Left economists Paul Baran and Paul Sweezy advocates of Third World liberation including Walter Rodney and Samir Amin Harry Braverman the author of *Labor and Monopoly Capital* and David Widgery the journalist of the May 68 revolts What these writers shared was a commitment to the values of socialism from below the idea that change must be driven by the mass movements of the oppressed In a world dominated by slump fascism and war they retained a commitment to total democracy *Dissident Marxism* describes the left in history Some readers will enjoy it as a history of revolutionary socialism in the years between Stalin's rise and the fall of the Berlin Wall Others will find here a challenging thesis that the most enduring of left wing traditions and highly relevant to the times we live in today were located in a space between the New Left and Trotskyism *Dissident Marxism* explores the lives and thinking of some of the most creative and striking members of the twentieth century left and asks if the new anti capitalist movement might provide an opportunity for just

such another left wing generation to emerge *World-systems Analysis* Immanuel Maurice Wallerstein,2004 A John Hope Franklin Center Book *Marx: Key Concepts* Riccardo Bellofiore,Tommaso Redolfi Riva,2024-01-18 This scholarly book conducts an extensive exploration into the central ideas of Karl Marx focussing on the key concepts that have defined his thought and legacy Bringing together a wealth of internationally renowned contributors across different generations Marx Key Concepts analyses in depth Marx s theories of surplus value money and capital and their reception in classical and contemporary economic sociological and philosophical debates *The Law of Worldwide Value* Samir Amin,2010-12 Portions of this book were originally published as *The Law of value and historical materialism* c1978 by Monthly Review Press **Eco-Sufficiency and Global Justice** Ariel Salleh,2009-01-20 As the twenty first century faces a crisis of democracy and sustainability this book brings women academics and alternative globalisation activists into conversation Through studies of global neoliberalism ecological debt climate change and the ongoing devaluation of reproductive and subsistence labour these uncompromising essays by women thinkers expose the limits of current scholarship in political economy ecological economics and sustainability science *Church and Ethical Responsibility in the Midst of World Economy* Paul S. Chung,2013-04-25 Magisterial in scope and scrupulous in its investigation and attribution of sources *Church and Ethical Responsibility in the Midst of World Economy* will take its place as an important document that contributes much in terms of prophetic praxis it challenges those who are comfortably complacent and unwilling to be disturbed **The African Transformation of Western Medicine and the Dynamics of Global Cultural Exchange** David Baronov,2010-05-14 Beginning with the colonial era Western biomedicine has radically transformed African medical beliefs and practices Conversely in using Western biomedicine Africans have also transformed it *The African Transformation of Western Medicine and the Dynamics of Global Cultural Exchange* contends that contemporary African medical systems no less biomedical than Western medicine in fact greatly enrich and expand the notion of biomedicine reframing it as a global cultural form deployed across global networks of cultural exchange The book analyzes biomedicine as a complex and dynamic sociocultural form the conceptual premises of which make it necessarily subject to ongoing change and development as it travels the globe David Baronov captures the complexities of this cultural exchange by using world systems analysis in a way that places global cultural processes on equal footing with political and economic processes In doing so he both allows the story of Africa s transformation of Western biomedicine to be told and offers new insights into the capitalist world system **The State of Capitalism** Costas Lapavistas,EReNSEP Writing Collective,2023-08-29 Thinking beyond pandemic capitalism The health emergency that broke out in 2020 is a landmark event in the development of capitalism confirming the underlying change signalled by the Great Crisis of 2007 9 The pandemic has catapulted the state to the centre of economic activity However a historic impasse is steadily becoming apparent at the core of the world economy Productive accumulation is flaccid as both profitability and labour productivity are weak Financialisation has entered a new phase as shadow banking

grew relative to other banks but is entirely dependent on the state The power of the state derives from command over fiat money and can certainly deliver enormous boosts to aggregate demand but that is not enough to tackle the weakness of the productive sector The rise in inflation for the first time in forty years indicates the impasse There is a transparent need for intervention on the supply side directly challenging capitalist property rights There is no evidence however that the ruling blocs in core countries would engage in such policies The pandemic crisis also brought to the fore fresh divisions of core and periphery across the world economy Imperialism has assumed new forms spurred by globally active financial capital and internationalised productive capital A renewed contest for hegemony has emerged as US power declined The economic challenge of China will unfold steadily in the years ahead intensifying political tensions and military rivalries This book is the work of a research collective comprising authors from several parts of the world It analyses these vital issues from the perspective of Marxist political economy and puts forth alternative anticapitalist proposals Handbook of Critical and Indigenous Methodologies Norman K. Denzin, Yvonna S. Lincoln, Linda Tuhiwai Smith, 2008-05-07 Built on the foundation of their landmark Handbook of Qualitative Research it extends beyond the investigation of qualitative inquiry itself to explore the indigenous and non indigenous voices that inform research policy politics and social justice *Communication and Capitalism* Christian Fuchs, 2020-05-19 An authoritative analysis of the role of communication in contemporary capitalism and an important contribution to debates about the forms of domination and potentials for liberation in today's capitalist society Professor Michael Hardt Duke University co author of the tetralogy Empire Commonwealth Multitude and Assembly A comprehensive approach to understanding and transcending the deepening crisis of communicative capitalism It is a major work of synthesis and essential reading for anyone wanting to know what critical analysis is and why we need it now more than ever Professor Graham Murdock Emeritus Professor University of Loughborough and co editor of The Handbook of Political Economy of Communications Communication and Capitalism outlines foundations of a critical theory of communication Going beyond Jürgen Habermas theory of communicative action Christian Fuchs outlines a communicative materialism that is a critical dialectical humanist approach to theorising communication in society and in capitalism The book renews Marxist Humanism as a critical theory perspective on communication and society The author theorises communication and society by engaging with the dialectic materialism society work labour technology the means of communication as means of production capitalism class the public sphere alienation ideology nationalism racism authoritarianism fascism patriarchy globalisation the commons love death metaphysics religion critique social and class struggles praxis and socialism Fuchs renews the engagement with the questions of what it means to be a human and a humanist today and what dangers humanity faces today
