deforestation of large areas which have caused viruses to migrate from their native area their reservoir are highlighted below The ethics of pandemics is approached from several philosophical points of view of which the most important in a crisis of such global dimensions is utilitarianism which involves maximizing benefits for society in direct conflict with the usual Kantian view of respect for people as individuals After a retrospective of the COVID 19 virus that caused the current pandemic its life cycle and its history with an emphasis on the philosophy of death the concept of biopower initially developed by Foucault is discussed with reference to the practice of modern states of control of the populations and the debate generated by Giorgio Agamben who states that what is manifested in this pandemic is the growing tendency to use the state of emergency as a normal paradigm of government An interesting and much debated approach is the one generated by the works of Slavoj i ek who states that the current pandemic has led to the bankruptcy of the current barbaric capitalism wondering if the path that humanity will take is a neo communism Another important negative effect is desocialization with the conclusion of some philosophers that we cannot exist independently of our relationships with others that a person s humanity depends on the humanity of those around him The last section is dedicated to forecasting what the world will look like after the pandemic and there are already signs of a paradigm shift including the sudden disappearance of the wall ideology a cough was enough to make it suddenly impossible to avoid the responsibility that every individual has it towards all living beings for the simple fact that he is part of this world and of the desire to be part of it The whole is always involved in part because everything is in a sense in everything and in nature there are no autonomous regions that are an exception The COVID 19 pandemic seems to restore the supremacy that once belonged to politics One of the virtues of the virus is its ability to generate a more sober idea of freedom to be free means to do what needs to be done in a specific situation CONTENTS Abstract Introduction 1 Viruses 1 1 Ontology 2 Pandemics 2 1 Social dimensions 2 2 Ethics 3 COVID 19 3 1 Biopolitics 3 2 Neocommunism 3 3 Desocialising 4 Forecasting Bibliography DOI 10 13140 RG 2 2 31039 74405 1

The Cure for Catastrophe Robert Muir-Wood, 2016-09-01 Hurricanes tsunamis earthquakes typhoons we watch in horror before springing into action with aid and support shocked again and again by the destructive power of the earth Except these disasters aren t only the earth s doing they are ours too Why did no one consider that a tsunami could disable the nuclear power plants in Fukushima Why did so many die when Katrina flooded New Orleans Not so long ago we could only focus on rescuing and sheltering survivors

now we can anticipate many natural disasters and plan for them In dozens of cities around the world we re able to identify the specific buildings that will be shaken apart blown down or reduced to rubble Yet every year thanks to politics and inertia we fail to act Traversing continents and history Robert Muir Wood blends gripping storytelling with scientific insights to detail our efforts to tame the most extreme forces of nature At the frontlines the predictive powers of new technologies mean we can foresee a future where there is an end to the pain and destruction wrought by these devastating cataclysms As The Cure for Catastrophe makes clear we have an extraordinary opportunity before us to make the decisions about what we build where we live and how warnings are communicated that could save millions of lives The Passions of John Addington Symonds Shane Butler, 2022 The first critical analysis to embrace a wide and representative selection of John Addington Symonds s work beyond his famous essays It explores Symonds as a complex thinker with an ambitious vision of the queerness of the world itself and follows his engagement with the art and literature of classical antiquity Searcher, 2002
