Hanno-Walter Kruft

L'architecture Considérée Sous Le Rapport De L'art Des Mœurs Et De La Législation:

Symbolic Space Richard A. Etlin, 1996-12-15 Richard A Etlin demonstrates how the conceptual basis of the modern house and the physical layout of the modern city emerged from debates among theoretically innovative French architects of the eighteenth century Examining a broad range of topics from architecture and urbanism to gardening and funerary monuments he reconsiders eighteenth century French architecture with regard to the ways in which it was informed by symbolic space This book provides an accessible introduction to a century of architecture that transformed the classical forms of the Renaissance and Baroque periods into building types still familiar today *A Treatise on the Decorative Part of Civil*

Architecture Sir William Chambers, 1862 *L'architecture considérée sous le rapport de l'art, des mœurs et de la législation* Claude Nicolas Ledoux, 1804 **The Architecture of the French Enlightenment** Allan Braham, 1989-01-01 Allan Braham

s comprehensive treatment of this brilliant and complex period introduces the reader to the major buildings architects and architectural patrons of the day At the same time it explores the broader determinants of architectural production the rapid economic expansion of Paris and the main provincial centers and the increasing demand for improved public amenities theaters schools markets and hospitals This generously illustrated book provides a vivid commentary on society and manners in pre Revolutionary France *Claude-Nicolas Ledoux* Anthony Vidler, 2021-08-02 Claude Nicolas Ledoux 1736 1806 is

today regarded as chief representative of French revolutionary architecture With his extraordinary inventiveness he projected the architectural ideals of his era Ledoux s influential buildings and projects are presented and interpreted both aesthetically and historically in this book His best known projects the Royal Saltworks of Arc et Senans the tollgates of Paris the ideal city of Chaux reveal the architect s allegiance to the principles of antiquity and Renaissance but also illustrate the evolution of his own utopian language With the French Revolution Ledoux ceased building as his contemporaries perceived him as a royal architect He focused on the development of his architectural theory and redefined the vision of the modern architect *L'architecture considérée sous le rapport de l'art, des mœurs et de la législation* Claude Nicolas Ledoux, 1981

L'ordre humain, ou, Le déni de la nature Gérard Chazal, 2006 L homme rompt avec l évolution animale et l ordre naturel D s son apparition il cr e et d veloppe son propre ordre artificiel et toujours plus loin de la nature G Chazal d crit une dimension humaine dans laquelle le monde est inachev et insatisfaisant et pour laquelle il s agit de b tir des abris cr er des images fabriquer des outils et organiser ce monde *L'architecture considérée sous le rapport de l'art, des mœurs et de la législation* Claude Nicolas Ledoux, Anthony Vidler, 1802 **The Ethical Function of Architecture** Karsten

Harries, 1998-07-31 Can architecture help us find our place and way in today s complex world Can it return individuals to a whole to a world to a community Developing Giedion s claim that contemporary architecture s main task is to interpret a way of life valid for our time philosopher Karsten Harries answers that architecture should serve a common ethos But if architecture is to meet that task it first has to free itself from the dominant formalist approach and get beyond the notion that

its purpose is to produce endless variations of the decorated shed In a series of cogent and balanced arguments Harries questions the premises on which architects and theorists have long relied premises which have contributed to architecture's current identity crisis and marginalization He first criticizes the aesthetic approach focusing on the problems of decoration and ornament He then turns to the language of architecture If the main task of architecture is indeed interpretation in just what sense can it be said to speak and what should it be speaking about Expanding upon suggestions made by Martin Heidegger Harries also considers the relationship of building to the idea and meaning of dwelling Architecture Harries observes has a responsibility to community but its ethical function is inevitably also political He concludes by examining these seemingly paradoxical functions

The Sound of Architecture Angeliki Sioli, Elisavet Kiourtsoglou, 2022-05-18 How sound and its atmospheres transform architecture Acoustic atmospheres can be fleeting elusive or short lived Sometimes they are constant but more often they change from one moment to the next forming distinct impressions each time we visit certain places Stable or dynamic acoustic atmospheres have a powerful effect on our spatial experience sometimes even more so than architecture itself This book explores the acoustic atmospheres of diverse architectural environments in terms of scale program location or historic period providing an overview of how acoustic atmospheres are created perceived experienced and visualized The contributors explore how sound and its atmospheres transform architecture and space Their essays demonstrate that sound is a tangible element in the design and staging of atmospheres and that it should become a central part of the spatial explorations of architects designers and urban planners The Sound of Architecture will be of interest to architectural historians theorists students and practicing architects who will discover how acoustic atmospheres can be created without complex and specialized engineering It will also be of value to scholars working in the field of history of emotions as it offers evocative descriptions of acoustic atmospheres from diverse cultures and time periods

Built upon Love Alberto Perez-Gomez, 2008-02-15 A vision of architecture that transcends concerns of form and function and finds the connections between the architect's wish to design a beautiful world and architecture's imperative to provide a better place for society The forced polarity between form and function in considerations of architecture opposing art to social interests ethics to poetic expression obscures the deep connections between ethical and poetical values in architectural tradition Architecture has been and must continue to be writes Alberto Perez Gomez built upon love Modernity has rightly rejected past architectural excesses but Perez Gomez argues the materialistic and technological alternatives it proposes do not answer satisfactorily the complex desire that defines humanity True architecture is concerned with far more than fashionable form affordable homes and sustainable development it responds to a desire for an eloquent place to dwell one that lovingly provides a sense of order resonant with our dreams In *Built upon Love* Perez Gomez uncovers the relationship between love and architecture in order to find the points of contact between poetics and ethics between the architect's wish to design a beautiful world and architecture's imperative to provide a better place for society Eros as first imagined by the early lyric poets of classical Greece is the invisible force at the root of our capacity to create and comprehend the poetic image Perez Gomez examines the nature of architectural form in the light of eros seduction and the tradition of the poetic image in Western architecture He charts the ethical dimension of architecture tracing the connections between philia the love of friends that entails mutual responsibility among equals and architectural program He explores the position of architecture at the limits of language and discusses the analogical language of philia in modernist architectural theory Finally he uncovers connections between ethics and poetics describing a contemporary practice of architecture under the sign of love incorporating both eros and philia

Vidler,2008-04-18 How the different narratives of four historians of architectural modernism Emil Kaufmann Colin Rowe Reyner Banham and Manfredo Tafuri advanced specific versions of modernism Architecture at least since the beginning of the twentieth century has suspended historical references in favor of universalized abstraction In the decades after the Second World War when architectural historians began to assess the legacy of the avant gardes in order to construct a coherent narrative of modernism s development they were inevitably influenced by contemporary concerns In Histories of the Immediate Present Anthony Vidler examines the work of four historians of architectural modernism and the ways in which their histories were constructed as more or less overt programs for the theory and practice of design in a contemporary context Vidler looks at the historical approaches of Emil Kaufmann Colin Rowe Reyner Banham and Manfredo Tafuri and the specific versions of modernism advanced by their historical narratives Vidler shows that the modernism conceived by Kaufmann was like the late Enlightenment projects he revered one of pure geometrical forms and elemental composition that

of Rowe saw mannerist ambiguity and complexity in contemporary design Banham's modernism took its cue from the aspirations of the futurists and the Renaissance modernism of Tafuri found its source in the division between the technical experimentation of Brunelleschi and the cultural nostalgia of Alberti Vidler's investigation demonstrates the inevitable collusion between history and design that pervades all modern architectural discourse and has given rise to some of the most interesting architectural experiments of the postwar period Kenzo Tange and the Metabolist Movement Zhongjie

Lin, 2010-02-25 Metabolism the Japanese architectural avant garde movement of the 1960s profoundly influenced contemporary architecture and urbanism This book focuses on the Metabolists utopian concept of the city and investigates the design and political implications of their visionary planning in the postwar society At the root of the group's urban utopias was a particular biotechnical notion of the city as an organic process It stood in opposition to the Modernist view of city design and led to such radical design concepts as marine civilization and artificial terrains which embodied the metabolists ideals of social change Tracing the evolution of Metabolism from its inception at the 1960 World Design Conference to its spectacular swansong at the Osaka World Exposition in 1970 this book situates Metabolism in the context of Japan's mass urban reconstruction economic miracle and socio political reorientation This new study will interest architectural and urban historians architects and all those interested in avant garde design and Japanese architecture
