L'architecture Considérée Sous Le Rapport De L'art Des Mœurs Et De La Législation 2 Vols:

A Treatise on the Decorative Part of Civil Architecture Sir William Chambers, 1862 *Claude-Nicolas Ledoux* Anthony Vidler, 2021-08-02 Claude Nicolas Ledoux 1736 1806 is today regarded as chief representative of French revolutionary architecture With his extraordinary inventiveness he projected the architectural ideals of his era Ledoux's influential buildings and projects are presented and interpreted both aesthetically and historically in this book His best known projects the Royal Saltworks of Arc et Senans the tollgates of Paris the ideal city of Chaux reveal the architect's allegiance to the principles of antiquity and Renaissance but also illustrate the evolution of his own utopian language With the French Revolution Ledoux ceased building as his contemporaries perceived him as a royal architect He focused on the development of his architectural theory and redefined the vision of the modern architect **Aesthetics of Opera in the Ancien Régime, 1647-1785**

Downing A. Thomas, 2002 This is the first study to recognize the broad impact of opera in early modern French culture Downing A Thomas considers the use of operatic spectacle and music by Louis XIV as a vehicle for absolutism the resistance of music to aesthetic and political agendas of the time and the long term development of opera in the eighteenth century humanist culture He argues that French opera moved away from the politics of the absolute monarchy in which it originated to address Enlightenment concerns with sensibility and feeling The book combines close readings of significant seventeenth century and eighteenth century operatic works circumstantial writings and theoretical works on theater and opera together with a measure of reception history Thomas examines key works by Lully Rameau and Charpentier among others and extends his reach from the late seventeenth century to the end of the eighteenth **The Architecture of the French Enlightenment**

Allan Braham, 1989-01-01 Allan Braham's comprehensive treatment of this brilliant and complex period introduces the reader to the major buildings architects and architectural patrons of the day At the same time it explores the broader determinants of architectural production the rapid economic expansion of Paris and the main provincial centers and the increasing demand for improved public amenities theaters schools markets and hospitals This generously illustrated book provides a vivid commentary on society and manners in pre Revolutionary France **The First Proofs of the Universal Catalogue of Books on Art: L-Z**

Hersey, 2001 A highly original view of the relationship between architecture and the biological sciences , *Charles Fourier* Jonathan Beecher, 1990-07-25 Examines the socialist visions of the nineteenth century utopian thinker describes the intellectual background of the period and assesses the influence of Fourier's ideas

First Proofs of the Universal Catalogue of Books on Art National Art Library (Great Britain), 1870 **Cyclopedia of Architecture** Robert Stuart, 1854 *Précis de the Lectures on Architecture* Jean-Nicolas-Louis Durand, 2000-01-01 Jean

Nicolas Louis Durand 1760 1834 regarded the Précis of the Lectures on Architecture 1802 5 and its companion volume the Graphic Portion 1821 as both a basic course for future civil engineers and a treatise Focusing the practice of architecture on utilitarian and economic values he assailed the rationale behind classical architectural training beauty proportionality and symbolism His formal systematization of plans elevations and sections transformed architectural design into a selective modular typology in which symmetry and simple geometrical forms prevailed His emphasis on pragmatic values to the exclusion of metaphysical concerns represented architecture as a closed system that subjected its own formal language to logical processes Now published in English for the first time the Précis and the Graphic Portion are classics of architectural education

The Making of Revolutionary Paris David Garrioch, 2004-08-16 An unusually compelling work of scholarly synthesis a history of a city of revolution in a revolutionary century Garrioch claims that until 1750 Paris remained a city characterized by a powerful sense of hierarchy From the mid century on however and with gathering speed economic demographic political and social change swept the city Having produced an extremely engaging account of the old corporate society Garrioch turns to the forces that relentlessly undermined it John E Talbott author of The Pen and Ink Sailor Charles Middleton and the King's Navy 1778 1813 A truly wonderful synthesis of the many historical strands that compose the history of eighteenth century Paris In rewriting the history of the French Revolution as a more than century long urban metamorphosis Garrioch makes a brilliant case for the centrality of Paris in the history of France Bonnie Smith author of The Gender of History Men Women and Historical Practice

Transgression in the Architectures of After-Modernity Carmen Popescu, 2025-09-03 In architecture transgressive acts have always been a reality in spite of rules and canons that have defined the discipline and its extended field However in recent decades their frequency and radicality have surged from rather random marginal and or idiosyncratic phenomena While their sudden rise can be explained as a reaction to the compulsive normativity of modernity the deeper roots are to be sought elsewhere the recent waves of transgressiveness are intimately linked to the hypercrisis affecting our world today spanning ecological political economic and social dimensions and catalysing fundamental mutations and disorders Some of these transgressive acts are motivated by a desire to dismantle a malfunctioning system but more often than not breaking the rules has become an inherent survival tactic amid urgent social challenges In our era of after modernity transgression emerges not just as an act of defiance but reveals a new paradigm at work a critical framework for reimagining the built environment challenging established orders and advocating for the rights of marginalised populations Drawing on a rich array of theoretical insights and empirical case studies from multiple countries this volume provides a unique forward looking perspective on transgressive acts in architecture as responses to today s ecological political economic and social crises

The Architecture of Percier and Fontaine and the Struggle for Sovereignty in Revolutionary France Iris Moon, 2016-11-25 As the official architects of Napoleon Charles Percier 1764 1838 and Pierre Fran ois L onard Fontaine 1762 1853 designed interiors that responded to the radical ideologies and collective forms of destruction that took place during the French Revolution The architects visualized new forms of imperial sovereignty by inverting the symbols of monarchy and revolution constructing meeting rooms resembling military encampments and gilded thrones that replaced the Bourbon lily with Napoleonic bees Yet in the wake of political struggle each foundation stone that the architects laid for the new imperial regime was accompanied by an awareness of the contingent nature of sovereign power Contributing fresh perspectives on the architecture decorative arts and visual culture of revolutionary France this book explores how Percier and Fontaine s desire to build structures of permanence and their inadvertent reliance upon temporary architectural forms shaped a new awareness of time memory and modern political identity in France

The True, the Fictive, and the Real Quatremere De Quincy, 1999 The importance of this dictionary stems from Quatremere s profound reflections on the nature of architecture on the principles which are at the source of his rules and on the roles of imitation and invention within tradition This book provides the first English translation of the theoretical essays from his seminal work *Le Dictionnaire Historique d Architecture*
