**Just Think! Grade 6 (eBook)** Cindy Barden, 2000-09-01 The goals of the educational process were classified by Benjamin Bloom into a hierarchy of educational objectives. This classification system, known as Bloom's Taxonomy, divides cognitive objectives into subdivisions ranging from simple to complex. Although other systems have been proposed, Bloom's remains widely recognized by educators and utilized in Critical Thinking curriculum. The six subdivisions include knowledge, comprehension, application, analysis, synthesis, and evaluation. This book is divided into six sections to match the subdivisions of Bloom's Taxonomy and designed to teach critical thinking skills by providing a variety of activities across the curriculum in math, language arts, science, social studies, history, geography, art, and music. An answer key is included. [AR 750-10](#)
