### **6.1 Engine Maintenance**

Racing puts extreme loads on engine components that will require unique maintenance performed on a regular basis. Ford Performance recommends the following:

1. Fill oil to the upper hole on the dipstick (Start with 14 qts of oil and add until intended level is reached).
2. Change engine oil and filter after every race event, or 4 hours of operation, whichever is sooner.
3. Spark plugs have a limited life expectancy and should be replaced after every event. Upon any misfire, plugs should be changed immediately.
4. Monitor engine oil pressure over time to understand engine bearing wear by picking a consistent RPM and temperature to look for deviations.
5. Check cylinder compression and leakage after every race event to monitor engine condition.
6. Replace O2 sensors every 20 hours of usage.
7. Complete engine maintenance is required after 40 hours of usage. This includes the replacement of the following parts:
  - pistons and rings,
  - main and rod bearings,
  - valves, valve springs, valve seals and spring retainers

In addition, the following parts should be checked for excess wear and/or cracks:

- Block
- Crank
- Heads
- Chain guides (primary and secondary)

After 2 seasons of usage, the cylinder block should be evaluated for replacement.

**See your engine builder for further recommendations.**
