Mismatch Kat Holmes, 2020-09-01 How inclusive methods can build elegant design solutions that work for all Sometimes designed objects reject their users a computer mouse that doesn't work for left handed people for example or a touchscreen payment system that only works for people who read English phrases have 20/20 vision and use a credit card Something as simple as color choices can render a product unusable for millions These mismatches are the building blocks of exclusion In Mismatch Kat Holmes describes how design can lead to exclusion and how design can also remedy exclusion Inclusive design methods designing objects with rather than for excluded users can create elegant solutions that work well and benefit all Holmes tells stories of pioneers of inclusive design many of whom were drawn to work on inclusion because of their own experiences of exclusion A gamer and designer who depends on voice recognition shows Holmes his Wall of Exclusion which displays dozens of game controllers that require two hands to operate an architect shares her firsthand knowledge of how design can fail communities gleaned from growing up in Detroit's housing projects an astronomer who began to lose her eyesight adapts a technique called sonification so she can listen to the stars Designing for inclusion is not a feel good sideline Holmes shows how inclusion can be a source of innovation and growth especially for digital technologies It can be a catalyst for creativity and a boost for the bottom line as a customer base expands And each time we remedy a mismatched interaction we create an opportunity for more people to contribute to society in meaningful ways

M. Langdon,J. Lazar,A. Heylighen,H. Dong,2014-07-08 Inclusive Designing presents the proceedings of the seventh Cambridge Workshop on Universal Access and Assistive Technology CWUAAT 14 It represents a unique multi disciplinary workshop for the Inclusive Design Research community where designers computer scientists engineers architects ergonomists policymakers and user communities can exchange ideas The research presented at CWUAAT 14 develops methods technologies tools and guidance that support product designers and architects to design for the widest possible population for a given range of capabilities within a contemporary social and economic context In the context of developing demographic changes leading to greater numbers of older people and people with disabilities the

general field of Inclusive Design Research strives to relate the capabilities of the population to the design of products. Inclusive populations of older people contain a greater variation in sensory cognitive and physical user capabilities. These variations may be co-occurring and rapidly changing, leading to a demanding design environment. Recent research developments have addressed these issues in the context of governance and policy, daily living activities, the workplace, the built environment, Interactive Digital TV, and Mobile communications. Increasingly, a need has been identified for a multidisciplinary approach that reconciles the diverse and sometimes conflicting demands of Design for Ageing and Impairment, Usability and Accessibility, and Universal Access. CWUAAT provides a platform for such a need. This book is intended for researchers, postgraduates, design practitioners, clinical practitioners, and design teachers. *Universal Access in Human-Computer Interaction.
