Library, 1897 A History of Education in Antiquity Henri Irénée Marrou, 1982 H I Marrou s A History of Education in Antiquity has been an invaluable contribution in the fields of classical studies and history ever since its original publication in French in 1948 French historian H I Marrou traces the roots of classical education from the warrior cultures of Homer to the increasing importance of rhetoric and philosophy to the adaptation of Hellenistic ideals within the Roman education system and ending with the rise of Christian schools and churches in the early medieval period Marrou shows how education once formed as a way to train young warriors eventually became increasingly philosophical and secularized as Christianity took hold in the Roman Empire Through his examination of the transformation of Greco Roman education Marrou is able to create a better understanding of these cultures Pappus of Alexandria Book 7 of the Collection Alexander Jones, 2013-11-09 The seventh book of Pappus s Collection his commentary on the Domain or Treasury of Analysis figures prominently in the history of both ancient and modern mathematics as our chief source of information concerning several lost works of the Greek geometers Euclid and Apollonius and as a book that inspired later mathematicians among them Viete Newton and Chasles to original discoveries in their pursuit of the lost science of antiquity This presentation of it is concerned solely with recovering what can be learned from Pappus about Greek mathematics The main part of it comprises a new edition of Book 7 a literal translation and a commentary on textual historical and mathematical aspects of the book It proved to be convenient to divide the commentary

into two parts the notes to the text and translation and essays about the lost works that Pappus discusses The first function of an edition of this kind is not to expose new discoveries but to present a reliable text and organize the accumulated knowledge about it for the reader s convenience Nevertheless there are novelties here The text is based on a fresh transcription of Vat gr 218 the archetype of all extant manuscripts and in it I have adopted numerous readings on manuscript authority or by emendation that differ from those of the old edition of Hultsch Moreover many difficult parts of the work have received little or no commentary hitherto
